utmost

GROUP SOLVENCY AND FINANCIAL CONDITION REPORT 2021

STATEMENT OF DIRECTORS' RESPONSIBILITIES

FINANCIAL YEAR
ENDED DECEMBER 2021

We acknowledge our responsibility for preparing the Solvency and Financial Condition Report ("SFCR") of Utmost Group plc in accordance with the Prudential Regulation Authority ("PRA") rules and the Solvency II ("SII") Regulations.

The Directors are satisfied that to the best of their knowledge and belief:

- a. Throughout the financial year to 31 December 2021, the Group has complied in all material respects with the requirements of the PRA rules and the SII regulations as applicable at the level of the Group; and
- b. It is reasonable to believe that at the date of the publication of the SFCR, the Group has continued to comply, and will continue to comply in all material respects with the requirements of the PRA rules and the SII Regulations as applicable to the Group and its solo insurance undertakings.

The SFCR was approved by the Board of Directors on 27 April 2022 and signed on its behalf by:

Ian Maidens

Group Chief Financial Officer

27 April 2022

INDEPENDENT AUDITORS' REPORT

Report of the external independent auditors to the Directors of Utmost Group plc ('the Company') pursuant to Rule 4.1 (2) of the External Audit Part of the PRA Rulebook applicable to Solvency II firms

Report on the Audit of the relevant elements of the Group Solvency and Financial Condition Report

OPINION

Except as stated below, we have audited the following documents prepared by the Company as at 31 December 2021:

- The 'Valuation for solvency purposes' and 'Capital Management' sections of the Group Solvency and Financial Condition Report of the Company as at 31 December 2021, ('the Narrative Disclosures subject to audit'); and
- Group templates S.02.01.02, S.22.01.22, S.23.01.22, S.25.01.22 and S.32.01.22 ('the Templates subject to

The Narrative Disclosures subject to audit and the Templates subject to audit are collectively referred to as the 'relevant elements of the Group Solvency and Financial Condition Report'.

We are not required to audit, nor have we audited, and as a consequence do not express an opinion on the Other **Information** which comprises:

- > The 'Summary', 'Business and performance', 'System of governance' and 'Risk profile' elements of the Group Solvency and Financial Condition Report;
- > Group templates S.05.01.02 and S.05.02.01;
- > The written acknowledgement by management of their responsibilities, including for the preparation of the Group Solvency and Financial Condition Report ('the Responsibility Statement');
- > Information which pertains to an undertaking that is not a Solvency II undertaking and has been prepared in accordance with PRA rules other than those implementing the Solvency II Directive or in accordance with an EU instrument other than the Solvency II regulations ('the sectoral information') as identified in the Appendix (Section F.1) to the Group Solvency and Financial Condition report on page 79.

To the extent the information subject to audit in the relevant elements of the Group Solvency and Financial Condition Report includes amounts that are totals, subtotals or calculations derived from the Other Information, we have relied without verification on the Other Information.

In our opinion, the information subject to audit in the relevant elements of the Group Solvency and Financial Condition Report of the Company as at 31 December 2021 is prepared, in all material respects, in accordance with the financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based, as supplemented by supervisory approvals.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) including ISA (UK) 800 and ISA (UK) 805, and applicable law. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the relevant elements of the Group Solvency and Financial Condition Report section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the Group Solvency and Financial Condition Report in the UK, including the FRC's Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

Our evaluation of the Directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting included:

- Obtained the Director's going concern assessment and challenged the rationale for downside scenarios adopted and material assumptions made using our knowledge of the Company's business performance, review of regulatory correspondence and obtaining further corroborating evidence;
- Considered management's assessments of the Solvency Capital Requirement coverage and liquidity position in forward-looking scenarios;
- Assessed the impact of severe, but plausible, downside scenarios:
- > Assessed the liquidity of the Company, including the Company's ability to pay policyholder obligations, suppliers and creditors as amounts fall due;

INDEPENDENT AUDITORS' REPORT (CONTINUED)

- Considered information obtained during the course of the audit and publicly available market information to identify any evidence that would contradict management's assessment of going concern; and
- Reviewed certain Board and Committee minutes, and attendance of relevant Audit, Risk and Compliance Committee meetings and significant component Audit Committee meetings.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date on which the Group Solvency and Financial Condition Report is authorised for issue.

In auditing the Group Solvency and Financial Condition Report, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the Group Solvency and Financial Condition Report is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

EMPHASIS OF MATTER - BASIS OF ACCOUNTING

We draw attention to the 'Valuation for solvency purposes' and 'Capital Management' sections of the Group Solvency and Financial Condition Report, which describe the basis of accounting. The Group Solvency and Financial Condition Report is prepared in compliance with the financial reporting provisions of the PRA Rules and Solvency II regulations, and therefore in accordance with a special purpose financial reporting framework. The Group Solvency and Financial Condition Report is required to be published, and intended users include but are not limited to the Prudential Regulation Authority. As a result, the Group Solvency and Financial Condition Report may not be suitable for another purpose. Our opinion is not modified in respect of this matter.

OTHER INFORMATION

The Directors are responsible for the Other Information.

Our opinion on the relevant elements of the Group Solvency and Financial Condition Report does not cover the Other Information and we do not express an audit opinion or any form of assurance conclusion thereon. In connection with our audit of the Group Solvency and Financial Condition Report, our responsibility is to read the Other Information and, in doing so, consider whether the Other Information is materially inconsistent with the relevant elements of the Group Solvency and Financial Condition Report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the relevant elements of the Group Solvency and Financial Condition Report or a material misstatement of the Other Information. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors for the Group Solvency and Financial Condition Report

The Directors are responsible for the preparation of the Group Solvency and Financial Condition Report in accordance with the financial reporting provisions of the PRA rules and Solvency II regulations, which have been supplemented by the approvals made by the PRA under section 138A of FSMA, the PRA Rules and Solvency II regulations on which they are based, as detailed below:

 Approval to use the matching adjustment in the calculation of technical provisions in respect of ULP.

The Directors are also responsible for such internal control as they determine is necessary to enable the preparation of a Group Solvency and Financial Condition Report that is free from material misstatement, whether due to fraud or error.

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE RELEVANT ELEMENTS OF THE GROUP SOLVENCY AND FINANCIAL CONDITION REPORT

It is our responsibility to form an independent opinion as to whether the information subject to audit in the relevant elements of the Group Solvency and Financial Condition Report is prepared, in all material respects, in accordance with the financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based.

Our objectives are to obtain reasonable assurance about whether the relevant elements of the Group Solvency and Financial Condition Report are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they

INDEPENDENT AUDITORS' REPORT (CONTINUED)

could reasonably be expected to influence the decision making or the judgement of the users taken on the basis of the Group Solvency and Financial Condition Report.

Irregularities, including fraud, are instances of noncompliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of regulatory principles, such as those governed by the Prudential Regulation Authority and the Financial Conduct Authority, and we considered the extent to which non-compliance might have a material effect on the Group Solvency and Financial Condition Report. We also considered those laws and regulations that have a direct impact on the Group Solvency and Financial Condition Report such as the PRA Rulebook applicable to Solvency II firms and the Solvency Il regulations. We evaluated management's incentives and opportunities for fraudulent manipulation of the Group Solvency and Financial Condition Report (including the risk of override of controls), and determined that the principal risks were related to inappropriate adjustments to derive the Solvency II Balance Sheet, such as increasing the value of Own Funds of the Company/Group, management bias in estimates and judgmental areas of Solvency II Balance Sheet and Solvency Capital Requirements such as the Solvency II valuation of Life Technical Provisions. Audit procedures performed included:

- > discussions with management and Internal Audit, including consideration of any known or suspected instances of noncompliance with laws and regulation and fraud;
- > reading key correspondence with the Prudential Regulation Authority and the Financial Conduct Authority in relation to compliance with laws and regulations;
- > reviewing relevant meeting minutes including those of the Audit Risk and Compliance Committee and the Board of Directors and attendance of certain Audit Committees of reporting components;
- > challenging assumptions and judgements made by management in their significant accounting estimates, in particular in relation to insurance liabilities;
- designing audit procedures to incorporate unpredictability around the nature, timing or extent of
- > reviewing the Group's register of litigation and claims in so far as they related to non-compliance with laws and regulations and fraud.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the Group Solvency and Financial Condition Report. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

USE OF THIS REPORT

This report, including the opinion, has been prepared for the Board of Directors of the Company in accordance with External Audit rule 2.1 of the Solvency II firms Sector of the PRA Rulebook and for no other purpose. We do not, in providing this report, accept or assume responsibility for any other purpose or to any other party save where expressly agreed by our prior consent in writing.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Sectoral Information

In our opinion, in accordance with Rule 4.2 of the External Audit Part of the PRA Rulebook, the sectoral information has been properly compiled in accordance with the PRA rules and EU instruments relating to that undertaking from information provided by members of the group and the relevant insurance group undertaking.

Other Information

In accordance with Rule 4.1 (3) of the External Audit Part of the PRA Rulebook for Solvency II firms we are also required to consider whether the Other Information is materially inconsistent with our knowledge obtained in the audit of the Company's statutory financial statements. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The engagement partner on the audit resulting in this independent auditors' report is Gary Shaw.

SUMMARY

ABOUT THIS REPORT

The purpose of the SFCR is to provide information to help customers and other stakeholders to understand the nature of the business, how the business is managed and its capital position. The Group SFCR has been prepared in accordance with the relevant PRA rules and SII Regulations.

This Group SFCR covers the year to 31 December 2021.

ABOUT UTMOST GROUP

Utmost Group plc (the "Company" or "UGP") and its subsidiaries form a specialist life assurance group (collectively, the "Group" or "Utmost"). The Group was founded by Paul Thompson and Ian Maidens (the "Founders") to be a leading consolidator for the United Kingdom ("UK") and European insurance market. The Group was founded on the belief that all its stakeholders are better served by being part of an active and growing franchise. Its purpose is to build a brighter future for its clients and to better serve all its stakeholders.

The ultimate parent company into which the Group's results are consolidated is Utmost Topco Limited (illustrated in the structure chart in Section B.1.1). Utmost Topco Limited is part-owned by the Founders (who hold 15.1% of ownership interest) and by funds managed by subsidiaries of Oaktree Capital Group LLC ("Oaktree") (who hold 84.9% of ownership interest). Oaktree is a leading global investment manager specialising in alternative investments with \$166bn (2020: \$148bn) in assets under management as of 31 December 2021. Oaktree is regulated by the US Securities and Exchange Commission ("SEC") and its UK entity, Oaktree Capital Management (UK) LLP, is authorised and regulated by the Financial Conduct Authority ("FCA").

Beneficial ownership of Utmost Group is currently held by the Founders and the limited partners in the Oaktree Funds, none of whom play any part in the management of those Funds. The management of the Oaktree Funds is delegated to the General Partners of the Funds, controlled by Oaktree. Oaktree therefore has significant indirect control of the investments in the Oaktree Funds and is deemed the ultimate significant controller of the Group.

The Group administers £64bn (2020: £37bn) of assets under administration ("AUA") on behalf of more than 560,000 (2020: 510,000) customers across the UK, Europe, the Middle East, Latin America and Asia. The Group employs more than 1,500 people.

The core divisions of the Group are Utmost International and Utmost Life and Pensions.

Utmost International is an international life assurance business which serves two key markets. It provides international life assurance to High-Net-Worth ("HNW") individuals through its Utmost Wealth Solutions ("UWS") business, and employee benefits to multinational corporates through its Utmost Corporate Solutions ("UCS") business.

The UWS and UCS businesses are open to new business. These businesses are focused on developing the most appropriate products and services for new and existing customers to help our customers secure their financial futures.

Utmost Life and Pensions is a specialist UK life consolidator focused on the acquisition of books of life assurance business in the UK. No new business is written by Utmost Life and Pensions other than the sale of annuities and flexible drawdown products to existing customers on the vesting of their pension savings contracts.

The Group strategy is framed along four strategic pillars;

- > the delivery of good client outcomes;
- the organic growth of Utmost International with ambitions to significantly increase the value of new business within 3 years;
- to complete strategic mergers and acquisitions ("M&A") transactions in UK run-off; and
- > to focus on optimised and efficient operations.

On 1 April 2021, the Group announced the proposed acquisition of Quilter International from Quilter plc.

Quilter International is a leading provider of insurance-based wealth solutions to affluent and HNW clients across the UK, Europe, the Middle East, Latin America and Asia. Its strategy complements the strategy of Utmost International, and its acquisition reinforced our strong existing position in these markets. The acquisition completed on 30 November 2021. The acquisition added £24bn of AUA and 90,000 policies to Utmost International and confirmed Utmost International's position as the leading global provider of international life assurance.

The Group issued its first public debt instrument in September 2021, a £400m 10.25 year Tier 2 bond with a 4% coupon. The bonds are listed on the Global Exchange Market ("GEM") in Dublin. The £300m of internal Tier 2 loan notes held by Utmost Holdings (Guernsey) Limited ("UHGL") were repurchased and the outstanding accrued interest balance of £6.4m repaid.

The bond represents an important step in the development of the Group's strategy. Long-term access to public markets enables the Group to continue investing in strategic growth and business development opportunities. The proceeds of the bond issue were used to support the acquisition of Quilter International.

The Group appointed a new independent non-executive chairman in October 2021 and an independent non-executive director ("INED") of the Group in July 2021.

SUMMARY (CONTINUED)

The new appointments strengthen the UGP Board ("Board"), complementing the experience of the existing directors. The appointments reinforce the culture of strong governance and risk management as the Group embarks on the next phase of its development.

A key focus of the year was our sustainability strategy. The Conference of the Parties ("COP26") summit in November 2021 was an important place for countries to come together to discuss how climate change will be tackled and to agree on global and national targets. The Group is committed to taking action to tackle climate change, demonstrated by a number of important commitments made through the year.

The summit set the global agenda on climate change with a number of significant steps. This includes the formation of the International Sustainability Standards Board ("ISSB") and progression towards a baseline standard for climate-related reporting supported by a Bank of England announcement that it will be actively monitoring climaterelated financial disclosures. A further key commitment was to a Pathway to Net Zero. The Group committed to be net zero in its shareholder assets by 2050, measured by carbon intensity, and halving this measure by 2030.

The Group is focused on the growth of its business both through the organic growth of Utmost International and identifying suitable acquisition targets in UK run-off.

The Group's ambition is to increase its penetration in key strategic markets in Europe, including France, as well as Asia and Latin America. Our proposition team develop and tailor our client offering, focused on our strategic goal of delivering good client outcomes. They actively review our propositions to ensure they remain competitive and provide optimal outcomes for customers. We seek feedback from partners to inform future development.

The financial and operational risks of acquisition targets are assessed as a part of due diligence and mitigants are identified. Integration plans are developed and resourced with skilled change staff to ensure efficiencies are driven in line with expectation.

The macroeconomic environment recovered in 2021 following 2020's Coronavirus ("COVID-19") related downturn, largely tied to the development and deployment of effective vaccines. Global asset prices recovered close to or exceeded pre-pandemic highs. The environment remains challenging in 2022 with significant volatility in equity and rates markets. The evolution of the Russian invasion of Ukraine remains uncertain, hitting growth expectations and likely resulting in higher food and energy prices. At this time all our thoughts and prayers are with the people of Ukraine. The Group has a very low exposure to Russian assets and is carefully monitoring the development of the conflict.

The Group is well positioned to take advantage of the fundamental growth trends in our markets. Our new business team sources business from a diverse range of partners across multiple geographies. New business was robust in 2021 with £1.5bn net flows on a pro-forma basis as if Quilter International business was owned by Utmost International for the whole of 2021 (2020: £0.0bn), reflecting the ongoing attractiveness of our solutions and excellent client service.

BUSINESS AND PERFORMANCE

Section A of this report contains information on the Group's structure, operations, and financial performance during 2021.

Operating profit is considered by management to provide a better view of the Group's underlying quality of earnings compared to the International Financial Reporting Standards ("IFRS") profit before interest and tax. The items excluded from operating profit, but included in IFRS profit, are generally related to M&A activity and considered to be more strategic in nature than representing the underlying operating performance. Operating profit for 2021 was £132m (2020 restated: £92m)*. IFRS profit before tax for 2021 was £388m (2020 restated: £110m)*.

The Group primarily writes unit-linked investment business under the UWS brand, whereby all of the investment risk is borne by the policyholder. UWS is a leading provider of wealth solutions through the use of unit-linked life assurance products. Our clients are affluent, HNW and Ultra-High-Net-Worth ("UHNW") individuals who are based in a wide range of jurisdictions globally. Our products help our clients to preserve their wealth and safeguard it for future generations.

The Group also writes life insurance business under its UCS brand, providing employee benefits including life, disability and critical illness cover to the employees of its clients (mainly multi-national groups) as well as pensions and savings products for the employees themselves. UCS offers a unique global employee benefit proposition for clients with staff situated across multiple global jurisdictions.

As noted above Utmost Life and Pensions is closed to new business. However, its in-force book is primarily life and pensions business written in the UK. The only business written is annuities sold to existing policyholders on the vesting of their pension savings contracts (including contracts with Guaranteed Annuity Options ("GAOs") and the new Flexible Drawdown Product.

Further details on the lines of business written by the Group are provided in Section A.1.6.

^{*}For full details of restatement see note 2 of the UGP 2021 Annual Report.

SUMMARY (CONTINUED)

Section A also contains information on the impact of COVID-19 on the Group's business and any events following the year end reporting date.

SYSTEM OF GOVERNANCE

The Board is responsible for leading and controlling the Group and has overall authority for the management and conduct of the Group's business, strategy, and development. The Board is also responsible for ensuring the maintenance of a sound system of internal control and risk management, and for the approval of any changes to the capital and management structure of the Group.

The Board has delegated a number of its responsibilities to the Audit, Risk and Compliance Committee, ("the ARCC") a Board Committee established in 2021. The ARCC assists the Board in carrying out its functions and to ensure there is independent oversight of internal control and risk management.

The system of governance is the Group's overall framework of policies, standards and practices which is in place to meet the requirements of sound risk-based management.

Section B of this report contains further information on Utmost's system of governance, in particular:

- > the structure of the system of governance;
- > the role of the Board and information on the Board of Directors:
- > the role of ARCC and the subsidiary board committees;
- > Utmost key functions;
- > remuneration policies;
- > principles used in assessing the fitness of key functions and Board of Directors;
- > overview of the risk management system;
- > overview of the internal control system;
- > information on the role and independence of the Internal Audit Function;
- > information on the role of the Actuarial function; and
- > information on the Group's outsourcing policy and outsourced services.

RISK PROFILE

The Risk Management Framework of the Group embeds proactive and effective risk management across the businesses. It seeks to ensure that all risks are identified and managed effectively and that the Group is appropriately rewarded for the risks it takes. Section C of this report contains further information on the Group's risk profile.

The Solvency Capital Requirement ("SCR") is the level of capital the Group is required to ensure it continues to be able to meet its obligations even if a very severe event (defined as a "1-in-200 year event") were to occur in the next 12 months.

Utmost Group holds a further capital buffer over regulatory requirements. This provides an additional buffer against adverse events, strengthening our policyholder protection.

The Group has adopted the Standard Formula specified in the SII legislation to assess the capital risks within Utmost.

RISK COMPONENTS OF THE SCR

The Group SCR is £1,110m, as at 31 December 2021 (2020: £689m), as calculated using the Standard Formula methodology.

The chart below sets out the material capital risk components of the Group's SCR before diversification. Further details of the Group's risk profile can be found in Section C.

SUMMARY (CONTINUED)

VALUATION FOR SOLVENCY PURPOSES

UGP uses the accounting consolidation-based method, also called Method 1, to prepare the Group SII balance sheet. Method 1 is the default method under the SII rules.

In preparing the Group's SII balance sheet, assets and liabilities are valued according to the EU Directive 2009/138/EC ("SII Directive") and related laws and guidelines. Under SII, assets and liabilities are required to be valued at fair value which is the amount for which they could be exchanged with a third party in an arm's length transaction. The valuation principles are broadly the same as those applied under IFRS but there are some notable exceptions including the valuation of deferred acquisition costs, intangible assets, the technical provisions, and the valuation of subordinated loans.

As at 31 December 2021, the Group's excess of assets over liabilities of £1,596m (2020: £978m) compared to consolidated IFRS net assets of £1,450m (2020 restated: £857m)*. A bridge between these bases is provided in Section D.

The Group calculates its SCR using the Standard Formula. Own Funds, including the calculation of technical provisions, are calculated based on the valuation requirements set out in the SII Directive.

Own Funds are the amount of shareholders and other funds which qualify as eligible Own Funds under the SII Rules. Own Funds consist of basic Own Funds and ancillary Own Funds. Pursuant to Article 88 of the SII Directive, basic Own Funds are composed of the excess of assets over liabilities and subordinated liabilities. Undertakings must apply for supervisory approval of ancillary Own Funds.

Section D of this report provides further information on the methods and assumptions used in the valuation of assets, technical provisions and other liabilities and an explanation of the main differences between the IFRS basis of valuation used to prepare the UGP 2021 Annual Report and SII valuation rules. The UGP 2021 Annual Report can be found at www.utmostgroup.co.uk

CAPITAL MANAGEMENT

The primary objective of capital management is to maintain an efficient capital structure using a combination of equity, shareholders' funds and subordinated debt, in a manner consistent with our risk profile and the regulatory and market requirements of our business.

The Group complied with all applicable regulatory capital requirements throughout 2021.

At 31 December 2021, the total regulatory eligible Own Funds to meet the SCR was £1,964m (2020: £1,262m), of which £1,567m was represented by Tier 1 capital and £397m Tier 2 capital. The Group SCR, which is calculated, based on the SII Standard Formula, was £1,110m (2020: £689m). The overall Group surplus position was £855m (2020: £573m) which translates to a Solvency Coverage Ratio of 177% (2020: 183%).

At 31 December 2021, the total regulatory eligible Own Funds to meet the minimum consolidated group solvency capital requirement ("MCGSCR") was £1,640m (2020: £1,004m), of which £1,564m was represented by Tier 1 capital. The MCGSCR, which is calculated, based on the SII Standard Formula, was £378m (2020: £225m).

The Group has two Matching Adjustment ("MA") portfolios within Utmost Life and Pensions Limited ("ULP"), that back some of the annuity business and Funeral Plan policies. The MA recognises the long-term nature of the Group's investments backing these liabilities and enables the Group to benefit from a higher discount rate in respect of these. The Group Solvency Coverage Ratio without the MA would be 175% (2020: 176%).

There are surplus funds within the MA portfolios of £1.3m (2020: £0.9m).

The Group does not make use of the volatility adjustment as referred to in Article 77d of the SII Directive or the transitional arrangements on interest rates as referred to in Article 308c in the SII Directive and does not have any Transitional Measures on Technical Provisions ("TMTPs") as referred to in the SII Directive.

Further detail on Capital Management is provided in Section E of this report.

^{*}For full details of restatement see note 2 of the UGP 2021 Annual Report.

A.1 BUSINESS

A.1.1 NAME AND LEGAL FORM

UGP is a public limited company incorporated and domiciled in England and Wales (No. 12268786). UGP is the holding company of the Utmost Group. The Group is part-owned by the Founders and by funds managed by subsidiaries of Oaktree.

UGP's registered office is 5th Floor, Saddlers House, 44 Gutter Lane, London, EC2V 6BR.

Other than The Equitable Life Assurance Society ("ELAS"), the Group's insurance subsidiaries are private companies limited by shares. The Group's core insurance subsidiaries are ULP, registered and domiciled in England and Wales, Utmost Limited (UL") and Quilter International Isle of Man Limited ("QIIOM") registered and domiciled in the Isle of Man, Utmost PanEurope dac ("UPE") and Quilter International Ireland dac ("QIID") registered and domiciled in Ireland, and Utmost Worldwide Limited ("UW"), registered and domiciled in Guernsey. ELAS is registered and domiciled in England and Wales and is a company limited by guarantee.

A.1.2 BASIS OF PREPARATION

This Group SFCR covers the year to 31 December 2021.

The Group's reporting currency for both IFRS and SII is Pounds Sterling. The Quantitative Reporting Templates ("QRTs") in Appendix F.1 are presented in £k. Figures presented in the tables contained within this report may not add up to the totals and subtotals presented due to rounding.

The majority of the financial information in Section A is taken from UGP's financial statements which are presented in the UGP 2021 Annual Report and which are prepared on an UK-adopted IFRS basis. UGP's 2021 Annual Report was approved and signed by the Board on 27 April 2022.

SII Economic Value ("SII EV") is an alternative performance measure used by the Group. SII EV provides an overall view of the underlying value of the Group attributable to shareholders. SII EV is considered by management to better reflect the commercial value of the Group than IFRS equity, as the latter excludes components of value such as the present value of future earnings arising from in-force business. SII EV represents a metric which better aligns with the traditional Embedded Value reporting which pre-dated the SII regulations which became effective on 1 January 2016.

A.1.3 SUPERVISORY AUTHORITIES

UGP is under the Group supervision of the PRA.

ULP and ELAS are regulated by the PRA and the FCA. UL is regulated by the Isle of Man Financial Services Authority ("IoM FSA"). QIIOM is regulated by the IoM FSA and its branches are regulated by their local supervisory authorities. UPE and QIID are regulated by the Central Bank of Ireland ("CBI"). UW is regulated by the Guernsey Financial Services Commission ("GFSC") and its branches are regulated by their local supervisory authorities. Some of UGP's non-insurance subsidiaries are also regulated by their local supervisory authorities.

CONTACT DETAILS

The Group's external auditor is PricewaterhouseCoopers LLP ("PwC").

PwC

7 More London Riverside, London, SE1 2RT

+44(0) 20 7583 5000

PwC Network firms also act as the external auditor for the insurance subsidiaries of UGP.

A.1.5 QUALIFYING HOLDINGS IN THE UNDERTAKING

There are no qualifying holdings in UGP.

A.1.6 MATERIAL LINES OF BUSINESS AND GEOGRAPHIES

The Group provides life assurance, investment and savings and employee benefit services through its subsidiaries.

The material lines of business of the Group's insurance undertakings and top 5 material geographical areas plus home country for both life and non-life obligations during 2021 can be seen within the Group QRTs (S.05.01.02 and S.05.02.01) in Appendix F.1.2 and F.1.3 and are listed below.

MATERIAL LINES OF BUSINESS

GEOGRAPHICAL AREAS

UK		
Finland		
Portugal		
Ireland		
Italy		
Hong Kong		

A.1.7 OPERATING SEGMENTS

The Group defines and presents operating segments in accordance with IFRS 8 Operating Segments which requires operating segments to be identified based on the information provided to the Chief Operating Decision Maker ("CDM"). The profit and loss information provided to the CDM and as presented in this note is on a different basis to that presented in the consolidated Statement of Comprehensive Income.

SEGMENT	DESCRIPTION
UWS	A provider of wealth solutions through the sale of unit-linked life assurance products.
UCS	A provider of employee benefits business including life cover, income protection and critical illness cover to corporate clients to protect their employees. UCS specialises in the provision of benefits to multinational corporations with employees in multiple jurisdictions.
ULP	A consolidator of UK life and pensions books of business. ULP is focused on unit-linked solutions and also provides annuity and with-profits solutions to policyholders.
Other	Centrally held assets and group head office expenses together with financing costs arising on the tier 2 loan notes are included in 'Other Group activities'. The elimination of inter-segment transactions and consolidation adjustments are also included within this segment.

A.1.8 SCOPE OF THE GROUP

A complete list of the undertakings within the scope of the Group is contained in the \$.32.01.22 Group QRT in Appendix F.1.7

The scope of the Group for Group solvency calculation under SII is the same in all material respects as the scope of the Group for the purposes of the UGP consolidated financial statements.

A.1.9 MATERIAL RELATED UNDERTAKINGS

The principal subsidiaries of UGP at 31 December 2021 are listed below.

	NAME	NATURE OF BUSINESS	UTMOST GROUP PLC'S HOLDING

A.1.10 BRANCHES

The Group's UK and Ireland insurance subsidiaries have no material foreign branches.

QIIOM has regulated branches in Singapore and Hong Kong.

UW has regulated branches in Singapore, Hong Kong and Switzerland and a non-regulated branch in Ireland.

The Irish service company, Utmost Services Ireland Limited ("USIL"), has a UK branch. The Isle of Man service company, Utmost Services Limited ("USL"), has a UK and an Irish branch.

A.1.11 SIMPLIFIED GROUP STRUCTURE

A simplified group structure chart is shown below. UGP is the holding company of the Group. The chart shows UGP and its main subsidiaries at 31 December 2021. For each subsidiary company shown the Group's ownership percentage is 100%.

A complete list of the Group's entities along with registered address, country of incorporation and ownership percentage is included in S.32.01.22 Group QRT in Appendix F.1.7.

A.1.12 DELIVERING OUR STRATEGY

Utmost Group has set clear strategic objectives for its businesses in order to provide effective insurance and savings solutions which deliver good outcomes, enhance our financial and operational performance to support the delivery of sustainable, strong returns for our investors, and make a positive difference by operating as a sustainable business.

To achieve its strategic objectives, the Group is focused on the delivery of its four strategic pillars:

- 1. Good client outcomes;
- 2. Organic growth of Utmost International with ambitions to significantly increase the value of new business within
- 3. Growth through further acquisitions in our UK run-off business; and
- 4. Optimised and efficient operations.

Utmost Group was founded on the belief that all stakeholders are better served as part of an active and growing franchise. Good client outcomes remain front and centre of our strategy and our overall purpose is to build a brighter future for our clients of current and future generations.

The Group was pleased to welcome an increasing number of colleagues back to our offices through 2021. The adaptations made through 2021 in areas such as client servicing and the acceleration of our digital strategy, with developments in our online servicing to provide customers with easy access to details of their policies, will lead to longer term efficiencies in our business model. Client confidence in our business in 2021 was demonstrated by our strong new business figures and by the high retention rates among our policyholders.

As lockdown restrictions eased and activity increased, governments and corporates determined to build back better. A key focus of the year was our sustainability strategy. The Group is committed to taking action to tackle climate change, demonstrated by a number of important commitments made through the year.

In April 2021 the acquisition of Quilter International was announced. The acquisition completed in November 2021. Quilter International was an Isle of Man based insurance company with Isle of Man and Ireland regulated insurance companies, branches in Hong Kong and Singapore and a sales office in Dubai International Financial Centre ("DIFC"). The acquisition confirms Utmost International's position as a leading global provider of international life assurance.

Quilter International's diversified business footprint and distribution network complement and strengthen Utmost International's existing position in these attractive markets, where Utmost International sees strong, continuing demand for wealth solutions for affluent and HNW clients.

Thorough integration planning was undertaken from announcement to completion of the acquisition. On 30 November 2021, a 100-day plan commenced to secure early synergies from the acquisition. The leadership team of the combined Utmost International Isle of Man and Quilter International operations was announced on 1 December 2021. A combined single suite of products, merging the best-of-breed products from the Utmost and Quilter ranges, was announced at completion, with duplicate products in each region closed to new business. The operational integration of the businesses is ongoing and expected to take 18-24 months to deliver all of the planned synergies. The hire of a Group Chief Technology Officer ("CTO") in 2021 will support the integration project as well as Utmost's longer term digital goals. Quilter International will be merged with Utmost International's operations in the Isle of Man, DIFC, Singapore and Hong Kong.

The separation and integration plans for the Quilter International integration incorporates governance structures, legal entity and branch structures, portfolio transfers, rebranding, and proposition. Utmost Group has agreed a Transitional Services Agreement ("TSA") with Quilter plc to facilitate a smooth integration process. The Group plans to effect a full exit from the agreed TSA services within 2 years. With regards legal structure, the end-state is for Utmost Group to have one legal entity or branch incorporated in each region in which it operates.

Utmost International new business flows including Quilter International were £4.8bn (2020: £1.8bn) in 2021 with net flows of £1.5bn on a pro-forma basis as if Quilter International business was owned by Utmost International for the whole of 2021 (2020: £0.0bn). Our continual focus on developing a modern, flexible proposition and the delivery of excellent customer service enabled us to support clients and partners and to ensure a smooth transition for Quilter International customers in a period of change.

Improvements in sentiment in 2021 with the roll-out of effective vaccines and increased economic activity supported robust sales throughout the year. Governments looked to fund their COVID-19 responses with discussions around minimum global corporate tax rates and wealth taxes. Clients sought advice in the changing fiscal environment driving adviser demand for robust solutions to aid clients in preserving and passing on their wealth, whilst maintaining their obligations to society. Our solutions enable our clients to maintain security over the wealth they have accumulated and control over the proceeds passing to future generations. Our solutions utilise available reliefs and deductions in line with tax legislation enabling clients to achieve tax mitigation. The scale and resources of Utmost Group afford us greater reach in supporting our clients today, and for the generations to come.

A key focus of the management team is embedding optimised and efficient operations across the Group. Efficient operations support an improvement in operating profit and a lower cost-per-policy. The Group's growing scale demands focus on efficiency initiatives and streamlining of processes and systems. The Group CTO will look to lead on a number of initiatives over the coming years to modernise and drive efficiencies in our existing IT estate. Successful integration of acquired businesses is key to the Group's consolidation strategy.

The International business operates a strategic in-house client servicing and investment administration platform. A series of migration projects have been successfully completed moving policies onto our strategic platform, securing tangible cost reductions. A further migration of complex unit-linked and unitised with-profits policies from an ex-Aviva International book completed in H2 2021. The ex-Aviva migration was in line with our strategy to perform administration in-house. We successfully migrated all of UCS' policies to our target employee benefit system in 2021.

As the administrator of £64bn (2020: £37bn) of our customers' insurance and savings assets, the Group is cognisant of its responsibility to invest in a responsible manner. The Group's sustainability strategy is to invest an increasing proportion of our assets in a sustainable manner, provide more information on the sustainability characteristics of our clients' investments and provide more sustainable investment options. The Group is providing data on the Environmental Social and Governance ("ESG") characteristics of its guided architecture funds on client factsheets. The majority of our International guided funds were in the first or second performance quartile, and the vast majority of our UK unit-linked funds outperformed their benchmarks, demonstrating the provision of good investment outcomes to clients.

Utmost Group has a strong culture encouraging dedication, agility and working with a collaborative spirit. Our strong values run through the entire Group, evidenced through our consistent success in recent years during periods of rapid and ongoing change and demonstrated most keenly through the pandemic crisis. The hire of a Group Head of Human Resources ("HoHR") during 2021 will support integrating our culture throughout the enlarged organisation and ensuring the Group continues to provide an inclusive work environment where each of our talented employees can reach their full potential.

Brexit

The impact of the UK's withdrawal from the European Union ("EU") is not expected to have a significant impact on the Group's operational activity and the Group's route to market is unaffected to date. Discussions are continuing between the UK and the EU regarding the ongoing

regulation of financial services. Until these discussions are concluded there are some uncertainties regarding the regulatory position going forward. The PRA may review its implementation of SII regulations which may cause material divergence between the UK and EU frameworks in the future.

The Group continues to monitor regulatory developments and engages with regulators where appropriate. The Group has contingency plans in place to ensure that it can effectively service our EU and UK customers irrespective of the outcome of the negotiations between the UK and the EU.

A.1.13 SIGNIFICANT EVENTS DURING THE REPORTING PERIOD

Significant events during the year to 31 December 2021 are summarised below. Further information is included in the UGP 2021 Annual Report.

Quilter International Acquisition

On 1 April 2021, the Group announced the acquisition of Quilter International from Quilter plc. Its strategy complements the strategy of Utmost International, and the acquisition reinforced the Group's strong existing position in its core markets.

The Group received the required regulatory and competition approvals from the European Commission, the IoM FSA, the CBI, the Dubai Financial Services Authority, the Insurance Authority of Hong Kong and the Monetary Authority of Singapore through 2021. The acquisition completed on 30 November 2021 and Quilter International became a part of Utmost International. The acquisition added £24bn of AUA and 90,000 policies to Utmost International and confirmed Utmost International's position as the leading global provider of international life assurance.

The acquisition is in line with the Group's growth strategy and positions the Group well to benefit from the fundamental growth trends in the international life assurance sector.

Tier 2 Bond Issuance

On 15 September 2021, UGP issued a £400m 10.25 year Tier 2 bond with a 4% coupon. The bonds are listed on the GEM in Dublin. The £300m Internal Tier 2 loan notes held by UHGL were repurchased and the outstanding accrued interest balance of £6.4m repaid.

The bond marked Utmost Group's inaugural public debt issuance and represents an important step in the development of the Group's strategy. The proceeds of the bond issue were used to support the acquisition of Quilter International. Long-term access to public markets enables the Group to continue investing in its strategic growth and business development opportunities.

Board Appointments

On 8 October 2021, Utmost Group announced the appointment of James Fraser as a new independent non-executive chairman. The Group appointed Gavin Palmer as an INED of the Group with effect from 28 July 2021. Gavin serves as the Chairman of the ARCC. The new appointments strengthen the Board, complementing the experience of the existing directors. The Board appointments and the establishment of the ARCC reinforce the culture of strong governance and risk management as the Group embarks on the next phase of its development. Details of the ARCC can be found in Section B.1.2.

Sustainability

A key focus of the year was on our sustainability strategy. The Group is committed to taking action to tackle climate change, demonstrated by a number of important commitments made through the year.

November 2021 saw the COP26 summit, which constituted a key place for countries to come together to discuss how climate change will be tackled, and to agree on global and national targets. A key commitment from the summit was to a Pathway to Net Zero. The Group committed to be net zero in its shareholder assets by 2050, measured by carbon intensity, and halving this measure by 2030. Steps are being taken to reduce the initial carbon footprint of the Group's operations and in 2021 the Group planted one tree for each employee, to help offset the 2020 carbon emissions.

The summit also announced the formation of the ISSB and progression towards a baseline standard for climaterelated reporting supported by a Bank of England announcement that it will be actively monitoring climaterelated financial disclosures. In line with this, we have affirmed our commitments to responsible investing and to running a sustainable business by becoming signatories to the United Nations-supported Principles for Responsible Investment ("UN PRI") and the Institutional Investors Group on Climate Change ("IIGCC"). The Group is publishing its inaugural Task Force on Climate-related Financial Disclosures ("TCFD") report for YE 2021 incorporating our Group's disclosures of our management of climate-related risks and opportunities.

Proposition

In October 2021, UWS announced its entry into France with the launch of a new product, Apex (France), for the expatriate market. The new product launch is an exciting development for the Group. France is a key strategic market for insurance-based wealth solutions and our entry into this market marks a significant milestone in the development of our growth strategy. Our proposition team comprises 45 colleagues based across the Isle of Man, Ireland, Guernsey and the UK.

Digitalisation

The digital transformation continued at pace in 2021 and the manner in which corporates utilise technology to add value to customers continues to evolve. The Group must continue to leverage emerging technology and supporting skills to ensure a robust business model. The ULP online service centre, MyUtmost, initially for ULP's former Equitable customers, will be launched mid-2022. It will provide customers a new channel, with the opportunity to view their policy values, communicate and transact online. It continues our journey to take bold steps in providing even better customer outcomes for our acquired businesses.

Corporation Tax Rate

The 2021 Finance Act, which was enacted on 10 June 2021, increased UK corporation tax from its current rate of 19% to 25% with effect from 1 April 2023. The Group has allowed for the projected impact of the latter change in tax rates in providing its deferred tax liability as at 31 December 2021. The rate change has resulted in an approx. £5.6m increase in the Group's deferred tax liability and a corresponding reduction in Own Funds. However the increase in the deferred tax liability has, through its impact on the loss absorbing capacity of deferred tax, resulted in an approx. £5.6m reduction in the Group's SCR. Accordingly the change in the future rate of UK corporation tax should not have any significant overall impact on the Group's level of Excess Available Capital.

Macroeconomic Environment

The macroeconomic environment recovered in 2021 following 2020's COVID-19 related downturn, largely tied to the development and deployment of effective vaccines. Global asset prices recovered close to or exceeded prepandemic highs. The environment remains challenging in 2022 with significant volatility in equity and rates markets. The evolution of the Russian invasion of Ukraine remains uncertain, hitting growth expectations and likely resulting in higher food and energy prices. At this time all our thoughts and prayers are with the people of Ukraine.

Central bank rhetoric became hawkish in late 2021 as high energy prices and supply chain pressures spurred recordhigh inflation. Whether central banks react to higher energy prices by increasing the magnitude or speed of interest rate rises in order to combat inflation, or reduce their pace of tightening in order to support the economy is not yet entirely clear.

The Group has limited exposure to asset prices given the high degree of asset and liability matching. The Group is well hedged against interest rate rises and higher base interest rates would increase the rates earned on the Group's short-term assets. The Group has a very low exposure to Russian assets and is carefully monitoring the development of the conflict.

A.1.14 EVENTS AFTER THE YEAR END DATE

Restricted Tier 1 Debt

On 20 January 2022, the Group issued its second public debt instrument, a £300m Restricted Tier 1 ("RT1") Perp-NC-7.5yr bond with a 6.125% coupon rated "BB" by Fitch. The bonds are listed on the GEM in Dublin.

The RT1 issuance diversifies the Group's sources of funding, accessing a different part of the capital stack and extending the Group's debt repayment profile.

Dividend

On 27 January 2022, the Company paid a cash dividend of £290m to its immediate parent company UHGL whom in turn repaid its outstanding £125m of external bank debt.

Group Head of Risk and Compliance

In February 2022, the Group hired a Group Head of Risk and Compliance. He will be responsible for the day-to-day development and maintenance of the Group Enterprise Risk Management framework for identifying, assessing, managing and monitoring regulatory risk across the Group, and ensuring that this is in line with the Group's stated risk appetite.

A.1.15 COVID-19 UPDATE

New business inflows were robust for 2021 with £1.5bn net inflows, in spite of ongoing uncertainty caused by the pandemic, where travel restrictions continued and guidelines were introduced around in-person meetings in our core markets. Clients' demand for advice was heightened given the uncertain fiscal backdrop. Our products provided straightforward, transparent solutions, with the Group well positioned to support clients and advisers with the provision of standardised, tax-efficient savings vehicles. The Group is well positioned to support the generations of today and tomorrow. Our propositions support clients who wish to preserve their wealth and pass this to future generations.

We welcomed an increasing number of colleagues back to the office in 2021. Throughout the pandemic, the Group maintained its high standard of client service and continued to meet all its obligations to clients. Clients and advisers were supported via telephone and email services and the Group continues to build out its online servicing.

Our Group supervisor, the PRA, and our insurance subsidiaries' regulators issued statements and guidance in relation to the pandemic. The Group and its subsidiaries monitored the situation closely and followed relevant government and national health agency advice in our markets. The health and safety of our employees, our clients and our partners were our priority throughout the period and precautionary measures were taken as required. Our sympathies are with those whose lives have been impacted as a result of the crisis whether through the loss of a loved one, financial difficulties or mental health consequences.

Throughout the year, the Group remained well capitalised with a high Solvency Coverage Ratio and a low leverage ratio. UGP is subject to ongoing stress testing based on extreme market conditions and holds adequate capital and liquidity to withstand such conditions.

A.2 UNDERWRITING PERFORMANCE

Due to the nature of the Group largely writing investment business, an analysis of underwriting performance does not provide meaningful information in respect of the financial performance of the Group. The focus is on the Group's SII EV and Group Solvency Coverage Ratio.

The total premiums written during the period were £3,015m (2020: £2,005m) and gross claims incurred were £2,957m (2020: £3,420m). Further information on the key elements of underwriting performance including the line of business can be found in the Group QRT's (S.05.01.02 and S.05.02.01) in Appendix F.1.2 and F.1.3.

A.3 INVESTMENT PERFORMANCE

A.3.1 INCOME AND EXPENSE ARISING FROM INVESTMENTS

The majority of the Group's business is unit-linked. Increases and decreases in the value of the assets covering unit-linked liabilities are matched by corresponding changes in unit-linked liabilities and so there is no firstorder impact on profitability.

Investment performance has a second-order impact on the profitability of the Group's unit-linked business because higher asset values result in increased income from asset management charges. Conversely, lower asset values can result in reduced income from annual management charges.

Information about the investment performance of the Group's invested assets, including assets held to cover unit-linked liabilities and shareholder assets is included in note 7 of the UGP 2021 Annual Report.

A.3.2 GAINS AND LOSSES RECOGNISED DIRECTLY IN EQUITY

The majority of the Group's financial assets and liabilities are measured at fair value through profit or loss ("FVTPL") in the Group's IFRS financial statements. Certain items such as exchange gains on translation of foreign operations are recognised within other comprehensive income ("OCI") (i.e., recognised directly in equity).

The following table has been extracted from the consolidated statement of comprehensive income within the UGP 2021 Annual Report.

Change in fair value of financial assets at fair value through OCI Foreign currency translation movements in the year Fair value movements of owner occupied land and buildings Re-measurement on retirement benefit asset	0.1	
Change in fair value of financial assets at fair value through OCI Foreign currency translation movements in the year Fair value movements of owner occupied land and buildings Re-measurement on	•	(0.1)

	67.2	85.6
31 DECEMBER 20	021 £m	2020 restated* £m

A.3.3 INVESTMENTS IN SECURITISATIONS

The Group did not invest in securitisations during 2021.

^{*}For full details of restatement see note 2 of the UGP 2021 Annual Report.

A.4 PERFORMANCE OF OTHER ACTIVITIES

The Group is primarily engaged in the following business activities from which it generates revenue: investment and asset management, revenue from fee income and other income from service activities, and life assurance (revenue from premium income).

The table below provides an analysis of the Group's total revenue on an IFRS basis and includes revenue related to assets backing unit-linked liabilities.

Further information relating to revenue is contained in the UGP 2021 Annual Report.

REVENUE	31 DECEMBER 2021 £m	31 DECEMBER 2020 £m
Net earned premiums	85.9	67.9
Fee income and other income from service activities	191.9	162.6
Other income	7.4	9.3
Total Revenue	285.1	239.9

A.4.2 OVERVIEW OF EXPENDITURE

The Group's total expenses on an IFRS basis for 2021 amounted to £124m (2020: £114m).

The table below provides an analysis of the Group's other operating and administrative expenses on an IFRS basis, as presented within note 8 of the UGP 2021 Annual Report.

OTHER OPERATING AND ADMINISTRATIVE EXPENSES	31 DECEMBER 2021 £m	31 DECEMBER 2020 £m
Staff costs	70.3	71.2
Depreciation of property plant and equipment	5.1	5.4
Amortisation of intangible assets - software	0.2	0.2
Auditor's fees	3.0	3.0
Auditor's fees on non-audit services	0.7	0.7
Professional fees	21.2	8.8
Other administrative costs	23.6	25.1
Total other operating and administrative expenses	124.1	114.4

A.4 PERFORMANCE OF OTHER ACTIVITIES (CONTINUED)

A.4.3 LEASE ARRANGEMENTS

Utmost Group plc as lessor

The Group had no lease arrangements during 2021 as lessor.

Utmost Group plc as lessee

The Group has entered into various operating leases on certain rented office locations across several jurisdictions. Such leases have varying terms, clauses, and renewal rights.

A.5 ANY OTHER INFORMATION

There is no additional information considered to require disclosure in Section A.

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE

The Board sets the strategic goals and risk appetite for the Utmost Group. It ensures that each of the operating businesses has adequate resources to ensure delivery of the strategy, reviews the operating and financial performance of the Group, and oversees the execution of the strategy of each operating business. The Board aims to maintain a high standard of corporate governance across the Group and upholds a sound structure for setting its strategy and objectives.

The Group's governance arrangements continue to evolve to support the long-term growth prospects of the business. In October 2021, shortly after the appointment of the Chairman, the Board established the ARCC, and agreed that this forum should be chaired by Gavin Palmer. The ARCC met once during 2021 and going forward, will have a minimum of four scheduled meetings per annum. Five meetings are scheduled for 2022. The ARCC will oversee financial reporting, internal financial controls and risk management systems and processes on behalf of the Board. The Group Internal Audit ("GIA") function will also be overseen by this Committee, as well as the Group's relationship with external auditors.

The operating businesses within the Group are governed by their constitutional documents, local law and regulation, and the Shareholder Agreement. As such each operating subsidiary company has its own governance structure all of which are broadly aligned across the Utmost Group.

The boards of directors of each of the operating subsidiaries ("subsidiary boards") each have mandates and duties which are drafted to align with the requirements of the Shareholder Agreement and local law and regulation.

Although each entity has a separately constituted board of directors, the Founders act as non-executive directors of each regulated entity to enable aligned oversight, direction and supervision through the subsidiary boards across the Group.

B.1.1 INTRODUCTION TO THE SYSTEM OF GOVERNANCE AND THE ADMINISTRATIVE, MANAGEMENT OR SUPERVISORY BOARD

Corporate Structure

UGP is an English holding company into which the results of the UWS, UCS, Quilter and Utmost Life and Pensions businesses are consolidated. The operating subsidiaries through which business is conducted include UPE and QIID, incorporated in Ireland, UL and QIIOM, incorporated in the Isle of Man, UW, incorporated in Guernsey and ULP, incorporated in England.

The operating subsidiary companies comply with local laws and regulations and report to the regulators as required by all applicable Codes and requirements. The Group's regulators include:

- > The PRA and FCA;
- > The IoM FSA;
- > The CBI;
- > The GFSC:
- > The Dubai Financial Services Authority;
- > The Insurance Authority of Hong Kong; and
- > The Monetary Authority of Singapore.

CORPORATE STRUCTURE

OWNERSHIP AND GOVERNANCE STRUCTURE

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE (CONTINUED)

B.1.2 THE UTMOST GROUP PLC BOARD

Utmost Group plc Board Membership

The Board of UGP comprises the non-executive Chairman James Fraser, who was independent upon appointment in October 2021, Gavin Palmer, an independent INED who also acts as Chairman of the ARCC, Paul Thompson, the Group CEO and Ian Maidens, the Group CFO (together the Founders), as well as Christopher Boehringer and Katherine Ralph, two non-executive directors representing OCM Utmost Holdings Ltd, the Group's majority shareholder.

Role and responsibilities of the Utmost Group plc Board

The Board is responsible for promoting the long-term success of the Utmost Group and, in particular, for setting the Group's strategic aims, monitoring management's performance against those strategic aims, setting the Group's risk appetite, ensuring the Group is adequately resourced and ensuring that effective controls are in place. The Board also sets the values and supports the culture of the Group.

The specific duties of the Board are clearly set out in the matters reserved for the Board and the Board Procedures which address a wide range of corporate governance matters and lists those items that are specifically reserved for decision by the Board.

Matters reserved for the Board

Matters requiring Board approval include:

- > Group strategy and business plans;
- > Financial reporting and controls, capital structure and dividend policy;
- > Group risk appetite and framework; and
- > Corporate governance matters (e.g., appointment and removal of directors across the Group, Board and Committee succession planning and the constitution of the Board Committees).

The Matters Reserved for the Board also set out the items that must be reported to the Board, such as senior leadership changes, significant litigation, or material regulatory breaches, and explain how matters that arise between scheduled meetings should be dealt with.

UGP Audit, Risk and Compliance Committee

The Board is supported by the ARCC which is responsible for making recommendations to the Board on the appointment of auditors and the audit fee, ensuring that the financial performance of the Company is properly monitored and reported on and reviewing the Company's financial statements and any formal statements on financial performance as well as reports from the Company's auditors on those financial statements. In addition, the ARCC reviews the Company's internal control and risk management systems to assist the Board in fulfilling its responsibilities relating to the effectiveness of those systems. The members of the ARCC are all non-executive directors, being Gavin Palmer (Chairman), James Fraser, Chris Boehringer and Katherine Ralph.

B.1.3 DELEGATION BY THE UTMOST GROUP PLC BOARD

As part of its governance structure, the Board will delegate the consideration of various matters to its ARCC, as explained above. In addition, the Board has delegated certain decisions to management. The delegated authorities operate in accordance with matters reserved for the Board. Where any event requiring financial transactions within certain limits also falls under the schedule of matters reserved for the Board, approval must be sought from the Board. Any payments or commitments falling outside the permitted authorities below must be approved by the Board. For the avoidance of doubt, this would include any payment or entry into commitments outside of the business plan where the total exceeds a certain quantum, as set out in the delegated authorities from time to time.

B.1.4 UTMOST GROUP SUBSIDIARY BOARD GOVERNANCE

Board and Committees of operating companies

Subsidiary boards are comprised of an Independent Chairman and a majority of non-executive directors, including the Founders, who are, as representatives of the Utmost Group and in accordance with the relevant Corporate Governance guidelines, not considered independent. Non-executive directors of each subsidiary board work collectively to fully understand the business and market conditions and provide constructive challenge to executive management. Whilst the Independent Chairman of each subsidiary board provides leadership, day-to-day management is delegated to the CEO of each business, who puts in place their own executive management structure and arrangements. The executive directors of each subsidiary board are the CEO and CFO of each business.

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE (CONTINUED)

The duties of the subsidiary boards include:

- developing the high-level strategy for their respective businesses;
- > periodically reviewing the business plans and performance, ensuring that their regulatory responsibilities are discharged efficiently;
- > ensuring that the principles of Treating Customers Fairly ("TCF") are embedded into the culture of each business;
- > ensuring that each business meets the interests of policyholders, customers, and shareholders;
- > approving the risk appetite of each business, monitoring the risk governance framework, and ensuring that risk management systems and controls are fit for purpose;
- > determining the appropriate investment parameters for each business.

The subsidiary boards each have a Committee structure, which are broadly aligned across the Group. The terms of reference of the subsidiary board committees are also aligned. Further detail on the remit of the subsidiary board committees is set out below:

Audit Committees ("AC")

Responsible for monitoring the integrity of the regulated entity's financial statements and the adequacy and effectiveness of internal controls and the risk management system. This includes the responsibility for the review of disclosures to the supervisory authority, including the SFCR, in addition to its statutory financial reporting and accounts disclosures.

Risk and Compliance Committees ("RCC")

Responsible for assisting the subsidiary board in its oversight of the risk management and compliance culture and ensuring compliance of the undertaking with all legal and administrative requirements. It is also responsible for: oversight of the regulatory capital position, advising the subsidiary board on the Group's risk appetite and compliance exposure of the firm; setting and monitoring the Group's risk management and compliance policies; and ensuring the effectiveness of its Own Risk Solvency Assessment ("ORSA"). These Committees align with the Remuneration Committees to embed risk-based Remuneration Policies.

Remuneration Committees ("RemCo")

The role of the RemCo is to oversee the ongoing appropriateness and implementation of the relevant Remuneration Policy, particularly for executive directors and their direct reports. Each subsidiary board determines the remuneration of the non-executive directors within the limits set in the terms of reference

matters reserved for the Board. No director is involved in any decisions as to their own remuneration.

Investment Committees

Responsible for ensuring that investment activities carried out are consistent with the Investment Policy adopted by the subsidiary board. Exercising control over the execution of the subsidiary board's strategic decisions and the sound and efficient management of investment-related matters.

> ULP With-Profits Committee

Advising the ULP Board on matters relating to treating customers fairly for its with-profits business and supporting the ULP Board in ensuring fairness to customers is embedded in the decision-making and execution of the Company's with-profits funds at all times, including all policies written within the with-profits funds.

> ULP Nomination Committee

Responsible for ensuring the ULP Board has a formal, rigorous, and transparent procedure in place to manage the appointment of new directors to the Board, and to ensure the ULP Board and its Committees have the appropriate balance of skills, experience, independence, and knowledge to enable them to discharge their respective duties and responsibilities effectively, including succession planning.

UPE Banking Committee

The Banking Committee established by UPE ensures that regular administrative matters can be dealt with by the directors without recourse to the UPE Board.

B.1.5 MANAGEMENT FORUMS, INCLUDING THE EXECUTIVE COMMITTEE

In order to ensure there is a clear division of responsibilities between the Board and executive management, the Board has identified certain 'reserved matters' for its approval, as summarised in B.1.2. In relation to all other matters, unless they are specifically reserved for shareholder approval, the Board delegates responsibility for these to the Group CEO, who then delegates responsibility for specific operations to the CEOs of the operating business entities from across the Group.

Oversight and control of performance, activity and risks within the business is overseen by the Group Executive Committee which is responsible for managing and overseeing the day-to-day business and affairs of the Group in accordance with the agreed strategy and the authority delegated to the Group CEO by the Board.

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE (CONTINUED)

B.1.5 MANAGEMENT FORUMS, INCLUDING THE EXECUTIVE COMMITTEE (CONTINUED)

The Group Executive Committee is chaired by the Group CEO and is composed of the Group CFO, plus the UK entity CEO and other senior managers as nominated by the Group CEO to represent certain business units and functional areas. Formal and regular meetings are held, and relevant outputs are reported to the Board regularly via the Group CEO and Group CFO.

The Group Executive Committee's key responsibilities include:

- a. development and execution of strategy and business plans, and monitoring of performance thereof;
- b. ensuring that activities are consistent with the strategy, risk tolerance/appetite and policies approved by the Board:
- c. reporting to the Board (via the Group CEO) on how it has discharged its responsibilities;
- d. oversee business functions, ensuring that the business has the necessary resources to meet its objectives;
- e. monitoring the financial position, ensuring that applicable legal and regulatory requirements (including capital and solvency) are met;
- f. overseeing business development and new business opportunities; and
- g. overseeing client relationships and customer experience.

B.1.6 OPERATING BUSINESS MANAGEMENT FORUMS

In addition to the subsidiary boards and their committees, each operating business CEO has established an Executive Committee in respect of the relevant business to support each CEO in their decision-making. The Executive Committees report to the subsidiary board through the CEO, and provision of management information to the Board.

These operating business Executive Committees and management committees generally have no delegated authority but make recommendations to the CEO or subsidiary board and its committees as appropriate. Each management committee and forum has a core membership consisting of relevant senior managers and, in general, management committees and forums are chaired by the relevant Senior Manager Function ("SMF") holder or local equivalent. Each management committee and forum has delegated authority from the CEO to perform certain roles and responsibilities assigned to it within terms of reference set by the relevant Executive Committee.

Examples of management committees include:

- > Senior Management Committee ("SMC").
- > Asset Liability Committee ("ALCO").
- > Fair Customer Outcomes Governance Committee.
- > Fair Value Pricing Committee ("FVP").
- > Data Governance Committee.

B.1.7 KEY FUNCTIONS

All members of the Board hold the Group SMF designation and each of the individual businesses referred to on page 16 of this document has an independent governance structure reporting into the Group. The CEOs of each business report into the Group CEO and the CFOs of each business report into the Group CFO. There are no other $\,$ SMFs defined at the Group level.

For the purposes of the SII Directive, Internal Audit is an Utmost Group function reporting to the Group ARCC chair. The other key functions for the SII firms sit within each of the operating business entities and include ARCC.

B.1.8 REMUNERATION POLICY

The Group Remuneration Policy was approved by the Board in March 2021. The Policy sets out the overriding principles to be applied for all remuneration schemes across the Group. All remuneration packages must demonstrate an appropriate balance between variable and fixed components to avoid employees being overly dependent on the variable component, while allowing the Group's businesses to operate in a manner that is aligned with local markets and regulations.

The Group's Remuneration policy is intended to attract, retain, and reward employees with the appropriate skills and experience who are required to run the Group's businesses effectively. The principles embodied in the policy include:

- > promoting sound and effective risk management that does not encourage risk-taking that exceeds the risk appetite of Utmost Group;
- > assisting the Group and its business entities to attract, motivate and maintain employees with relevant skills to help achieve the business' objectives;
- > promoting consistency of approach and transparency across the Utmost Group;
- ensuring that the aggregate potential value of remuneration awards do not threaten the business' ability to maintaining an adequate capital base; and

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE (CONTINUED)

ensuring that remuneration arrangements for Material Risk Takers ("MRTs") are appropriate, encourage exceptional performance in a fair and responsible manner and reward them for their individual contributions to the medium and longer-term success of Utmost Group.

Remuneration components

Remuneration schemes consist of four primary elements: base salary, benefits during employment, retirement benefits and performance related incentives. The proportion of each element within the overall package will vary by operating business and role. Some senior positions may include a fifth element which is a reward under a long-term incentive plan ("LTIP").

FIXED REMUNERATION

BASE SALARY AND BENEFITS

SALARY LEVEL BASED ON JOB

Responsibilities, experience, and market conditions VARIABLE REMUNERATION

SHORT TERM INCENTIVE

LONG TERM INCENTIVE

VARIABLE REMUNERATION

Awards are discretionary based on business and individual performance.

The base salary and benefits are determined by the role, responsibility, and experience of the individual and having regard to local market comparisons, including relevant comparator companies of broadly similar size and complexity.

The discretionary annual incentive schemes will reflect individual, operating businesses and/or Utmost Group performance (as applicable) and support the delivery of benefits and services to customers, in a manner which promotes sound risk management. Any incentive awards are based on the delivery of objectives that are closely aligned to the Group or operational businesses critical priorities. A number of incentive schemes exist that are linked to the level of the role in the business, and where appropriate, the type of role.

The Group Remuneration Policy is supported by performance management processes that promote the development of a high-performance culture in line with the Group's strategy and values. Each employee will have a number of objectives set annually and awards will be assessed based on the performance of these objectives. This may include adjusting the variable component based on an assessment of current and future risks and the cost of capital for the Group and the operating businesses, with the potential for not awarding any variable component.

Variable remuneration for control functions (e.g., Risk, Compliance, Internal Audit, Actuarial) is not materially dependent on the performance of the areas that they oversee.

The remuneration of INEDs is designed to attract and maintain high quality board members while being consistent with maintaining their independence. The INEDs receive a set fee for their services and are not entitled to any performance-based options or incentive payments.

The Group Remuneration Policy is made available to all employees via the Group Intranet.

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE (CONTINUED)

B.1.9 MATERIAL CHANGES TO THE SYSTEM OF GOVERNANCE OVER THE REPORTING PERIOD

The changes to the composition of the Board, the formation of the ARCC, the implementation of the Group Policy Suite and the embedding of the Risk Management Framework as previously described are considered to be material developments to the Group's system of governance.

B.1.10 ASSESSMENT OF ADEQUACY OF THE SYSTEM OF GOVERNANCE

The Company was established as the holding company of the Utmost Group in October 2020. The Board is responsible for setting the overall direction and risk appetite of the Group as a whole, to generate value for shareholders and its stakeholders including customers, employees, and the communities in which we operate. The subsidiary boards set their own objectives and risk appetite within the boundaries of the overall Group Risk Appetite and are responsible for conducting their everyday business, in line with the regulations and legislation of the local jurisdictions within which they operate.

The governance structure set out in the sections above is proportionate for a federated oversight model, where the day-to-day decision-making powers are largely delegated to the regulated operating businesses. The Group CEO and Group CFO are members of the subsidiary boards, thus directly embedding Group oversight within the operating businesses to ensure alignment within the overall strategy and risk appetite of the Board.

Each of the subsidiary boards are required to perform annual assessments of effectiveness and each has concluded that they are operating effectively. The Board of UPE is, at the date of writing this report and in line with the requirements of CBI regulated entities, undergoing an external effectiveness review conducted by an independent third party.

The internal audit function that is fully independent of the operating businesses, provides an effective 3rd line of defence. The Group Head of Internal Audit ("GHoIA") has an informal reporting line to the Group ARCC Chairman. The Risk, Audit and Compliance functions are well established and embedded within each of the regulated operating businesses and are well positioned to provide effective and timely 2nd line risk challenge to the 1st line executive directors and senior management in the operating businesses (as described in the SFCR of each regulated entity).

The Board considers the Group's system of governance arrangements to be adequate and proportionate based on the current structure of the Group. In addition, it considers the subsidiary boards to be conducting their duties in accordance with the local requirements and in accordance with the mandate set by the Group. The governance arrangements will continue to evolve in alignment with the implementation of the Group's business strategy.

B.2 FIT AND PROPER REQUIREMENTS

The Group's approach to implementing and embedding processes and procedures to ensure fitness and propriety is described below. Fitness and propriety across the Group is essential for protecting the Group's reputation, maintaining the confidence of our customers and ensuring regulatory compliance.

The Group is committed to ensure that all fit and proper regulatory requirements are met. It must be able to demonstrate that it employs people who are fit and proper for the professional discharge of the responsibilities allocated to them. This, in turn, will assist in developing an appropriate culture in the business, thereby minimizing risk and ensuring sound and prudent management of the business.

The Group therefore ensures that all people, subject to the fit and proper requirements, have appropriate qualifications, knowledge, skills and experience required to carry out their

- > are, and remain, competent, fit, and proper to discharge their responsibilities;
- are aware of their obligations under the regulators' relevant conduct rules and standards; and
- > are aware of the need to avoid, via adhering to the Group's conflicts of interest policies, activities that could create conflicts of interest or the appearance of conflicts of interest.

The Group ensures that requirements are fulfilled by operating procedures during recruitment and ongoing employment, to be satisfied that an individual:

- > will be open and honest in their dealings and is able to comply with the requirements imposed upon them (honesty, integrity, and reputation);
- > has the necessary knowledge, skills, and experience to carry out the function they are to perform (competence and capability);
- > is financially sound (financial soundness); and
- > each of the Utmost businesses has Fit and Proper Policies in place that set out the way in which each company complies with the relevant Fit and Proper requirements applicable to each jurisdiction.

The Group and its operating businesses operate a robust recruitment process and carry out the appropriate due diligence on all candidates. Anyone who is being assessed to perform in a specified role is subject to a rigorous review of their fitness and propriety against the role requirements. All assessments with a fit and proper requirement are supported by a Human Resources ("HR") professional.

This includes exercises to map the candidates' capabilities and experience against the requirement of the role profiles. The Group also takes other steps such as obtaining credit checks and checks from the Disclosure and Barring Service (or local equivalent), requiring proof of qualifications, requesting references and requiring candidates to complete self-certification regarding potential conflicts of interest.

Concerns are escalated to, and discussed with, the local Chief Risk Officer ("CRO") or member of the senior management team as appropriate. If screening concerns cannot be satisfactorily resolved, any offer of employment is withdrawn.

The individuals currently subject to the Fit and Proper requirements at the level of the Group are the Board of Directors, shown below.

B.3 RISK MANAGEMENT SYSTEM INCLUDING OWN RISK AND SOLVENCY ASSESSMENT

B.3.1. RISK MANAGEMENT SYSTEM

The Group's risk management system is articulated through its Enterprise Risk Management ("ERM") policy and supporting framework. The Group has implemented a corporate governance structure around a decentralised risk management system that is proportionate to the scale and complexity of the Group, but which allows the Board to:

- > establish its strategy towards risk taking;
- > oversee the communication and monitoring of adherence to the appetite for risks; and
- > oversee the identification, measuring, monitoring, management and reporting of risks.

The Group ERM Policy seeks to embed proactive and effective risk management in the operating businesses by maintaining risk management functions and structures in a devolved model, whereby oversight is conducted by the respective subsidiary boards and committees and reported to the Board, as appropriate.

Subsidiary boards have the authority to establish local risk management policies and frameworks to manage risks to within the overall risk appetite agreed by the Board. To this end, the management of the organisation at all levels is required to be risk aware and understand that Risk Management is part of all employees' responsibilities in delivering the business objectives in an efficient and effective manner in line with an agreed and established risk appetite and enterprise vision and values.

Risk Culture

A core objective of the risk management system is to embed a positive and open risk management culture within the Utmost Group. The risk culture is embedded through the following:

- > the CROs of all operating businesses are members of senior management and, in the execution of their roles, integrate risk management thinking into the decisionmaking process;
- > the Group and operating business strategic planning and ORSA processes are aligned to include a risk-based forwardlooking view in the development of the strategic plan;
- > the Risk Function in each operating business is involved in material initiatives which may impact the risk profile of that operating business or the Utmost Group as a whole. The role of each Risk Function is to integrate the risk management assessment methodologies into the decision-making process by supporting the business in identifying, assessing, and managing the risks associated with these initiatives; and

> each Risk Function works closely with the business teams in its own operating business, providing advisory services and promoting the advantages of a positive risk culture.

Risk Strategy

The risk strategy of the Group provides an overarching view of how risk management is incorporated across all levels of the business, from decision-making to strategy implementation. It assists the Group in achieving its strategic objectives by supporting the operating businesses with improved client and shareholder outcomes. This is achieved through the identification and management of an acceptable level of risk ("risk appetite") and by ensuring that the Utmost Group is appropriately rewarded for the risks it takes. To ensure that all risks are managed effectively, the Utmost Group is committed to:

- > embedding a risk aware culture;
- > maintaining a strong system of internal controls;
- > enhancing and protecting client and shareholder value by continuous and proactive risk management;
- > maintaining an efficient capital structure; and
- > ensuring that risk management is embedded into day-to-day management and decision-making processes.

Risk Appetite

Risk appetite is the level of risk that the Utmost Group is willing to accept in pursuit of its strategic objectives. Risk preferences are outlined and documented within the Risk Appetite Statement. The subsidiary boards tailor their own risk appetite statements within the boundaries of the risk appetite set by the Board. The operating businesses develop metrics to translate the risk appetite into quantitative and measurable risk limits and indicators, and to embed them into the operating processes to ensure proper monitoring and steering of business activities.

Risk appetite is embedded into the key decision-making processes in the operational businesses by looking at four main dimensions, namely capital, liquidity, earnings and expenses, consistent risk metrics are in place to ensure that its risk profile is managed within the stated appetite and regulatory requirements, triggering consideration of actions required whenever tolerance levels are reached.

B.3 RISK MANAGEMENT SYSTEM INCLUDING OWN RISK AND SOLVENCY ASSESSMENT (CONTINUED)

B.3.1. RISK MANAGEMENT SYSTEM (CONTINUED)

Risk Management Governance Structure

Risk taking activities in the operating businesses are governed by the three lines of defence model, which is widely used within the financial services industry. This model separates ownership and management of risk from oversight and independent assurance as follows:

> Own and manage the risks

The first line of defence is operational management who perform day to day operational activities and selfassessment of their risks;

Oversee and provide specialist support

The second line of defence are primarily the Risk and Compliance functions, who monitor compliance with the risk management framework and perform independent oversight of operational management and risk-taking activities; and

Independent process assurance

The third line of defence, provided by Group Internal Audit, is the independent review and challenge to the level of assurance provided by operational management and the control functions (1st and 2nd line).

B.3.2 GROUP OWN RISK AND SOLVENCY ASSESSMENT

The Group ORSA is the primary means by which the Board and other key stakeholders are provided with a comprehensive understanding of the Group's risk profile and expected capital needs over its business planning period. The analysis, findings, and recommendations (i.e., the output) from the Group ORSA are therefore a key part of the Board's strategic decision-making process and the way in which these decisions are implemented by relevant members of the senior management team.

The Group's current strategic objectives, business plan and target risk profile are key inputs into the scope and focus of the Group ORSA. The Group Board together with senior management play a significant and ongoing role in determining the set of scenarios which will be included in the Group ORSA, the assumptions for each of these scenarios, and the criteria against which the results will be assessed.

The Group ORSA Policy requires that the ORSAs of UGP and its operating businesses:

- provide key stakeholders with a comprehensive understanding of the relevant entity's risk profile, its capital needs, and the link between risk and capital;
- > are forward-looking, and provide insight into both the current and expected future risk profile and capital position;
- > allow identification, assessment, monitoring and management of all material risks, in order to ensure there is sufficient capital resources to meet the solvency requirements across the business planning cycle;
- > are used as a key decision-making tool;
- are designed to be specific to the relevant entities and the specific environments in which they operate;
- are embedded as an ongoing process which comprises regular analysis, reporting, discussion and management action; and
- > inform and respond to the way the Utmost Group and its operating businesses are run on a continuous basis.

B.3 RISK MANAGEMENT SYSTEM INCLUDING OWN RISK AND SOLVENCY ASSESSMENT (CONTINUED)

GROUP ORSA PROCESS

WORK STREAM	ACTIVITY	DESCRIPTION
DESIGN	Process & Document Design	Review UGP ORSA process and documentation to ensure the ORSA remains fit for purpose and compliant with current guidelines.
REPORTING & DOCUMENTATION	ORSA Policy	Sets out the purpose, scope, process and aims of the Group's ORSA.
	Annual ORSA Report	Consolidation of the solvency position and risk profile of the Group's operating business ORSAs under base and alternative scenario conditions, including an assessment of the risks faced in implementing the strategy and business plan under a variety of scenarios including any Group specific stresses.
	Submission	Submission of the completed ORSA Report to the PRA.
STANDARD FORMULA TESTING	Standard Formula Appropriateness Exercise	Analysis of the standard formula SCR relative to the Group's current and emerging risk profile to ensure it remains appropriate.
SCENARIO DEVELOPMENT	Scenario Design & Definition	Development of any UGP specific scenarios required for the Group ORSA framework (over and above what is included in the operating business ORSAs).
PROJECTIONS	ORSA Projection Runs	Projection of the Group's balance sheet and risk profile under base and alternative scenarios.
	ORSA Control & Validation	Checks to ensure consolidation of business projections is complete and accurate.
USE	Strategy & Business Plan	Insight from the ORSA informs the Group's strategic direction and business planning.
	Risk Appetite	ORSA forecasts used to assess the Group's alignment with risk appetite.
	Investigation	ORSA analysis used to identify areas for further investigation, typically carried out by the Group actuarial team.
	Decision Making	The ORSA is used as a key management tool in the decision-making processes of the Group.

The output will be reviewed by the Group Board, ARCC members and senior management to provide the opportunity to interrogate, challenge and provide feedback on the various inputs into and outputs from the Group ORSA analysis.

The Group ORSA report will be completed annually and will be updated during the year in the event of any material change to the Group's risk profile. The Group ORSA process is performed simultaneously at the level of the Group and its individual insurance companies.

B.4 INTERNAL CONTROL SYSTEM

The Board is responsible for maintaining an effective system of internal control and for ensuring that controls are designed both to be aligned to risk exposures and to provide reasonable assurances regarding the achievement of the following objectives:

- > effective and efficient operations;
- > integrity of financial reporting;
- > compliance with laws, regulations, and internal policies;
- > effective risk management within approved risk appetite

The Group's principles of internal control include establishing:

- > clearly defined corporate governance structures and delegated authorities;
- > clear lines of responsibility each operating business and function has clearly defined lines of responsibility;
- > financial reporting control procedures and systems;
- > the internal control system of each business and function including policies, control procedures and systems which are regularly reviewed;
- reliable information and communication at all levels of the organisation;
- > control functions to oversee and monitor the system of internal control; and
- > risk management frameworks the risks to which the Group is exposed are identified and appropriately managed.

The Group promotes the importance of appropriate internal controls via the Group Internal Control Policy:

- ensuring that all personnel are aware of their role in the system of internal control;
- > ensuring a consistent implementation of the system of internal control across the Group;
- > establishing monitoring and reporting mechanisms for decision making processes; and
- establishing processes for employees to raise concerns ("Whistleblowing").

The implementation and maintenance of the system of internal control in each operating business is the responsibility of the executive directors and senior management within the respective business. At Group level this responsibility rests with the Group CEO and Group CFO and ultimately the Group Board.

Group Policy Suite Framework

The Board has approved a suite of policies that set out the overriding principles and minimum requirements that the operating businesses must follow to ensure that the key risks to which the Group is exposed are controlled and managed in accordance with the Group's overall risk appetite. The Group Policy Suite is a key component in the Group's system of internal controls. The CEOs of the operating businesses are required to attest on an annual basis that the relevant businesses have complied with the key requirements of the Group Policies. The Group Policy Suite includes policies that cover:

- > Enterprise Risk Management;
- > Operational Risk;
- > Business Resilience;
- > Internal Control;
- > Internal Audit;
- > Outsourcing Management;
- > Investment & Market Risk;
- > Insurance Risk;
- > Credit & Liquidity Risk;
- > Remuneration;
- > ORSA; and
- > Fitness & Propriety.

Three lines of defence assurance model

The Group uses the three lines of defence model to support and monitor the various control activities undertaken by employees (see B.3.1). The model clearly articulates the division of responsibilities for risk management between the three lines, the business and support functions, Compliance and Risk Functions and Internal Audit.

B.4 INTERNAL CONTROL SYSTEM (CONTINUED)

B.4.1 COMPLIANCE FUNCTION

The Group operates within a financial services regulatory regime in the UK and worldwide. The regulators define the standards required within the business via their rules and guidance, which cover key areas around customer protection and sustainability – with expectations that these principles are embedded in the culture of the business, driven from the top of the organisation, and managed via robust governance frameworks.

All employees are required to have an awareness of the requirements with regards to their role to ensure the business meets the standards required in both letter and spirit, with some SMF holders having specific accountabilities and obligations to the local regulators. Good compliance standards and risk management helps the business build trust with customers and other stakeholders, and promotes a culture where positive individual behaviours ensure the customer is at the heart of the systems and controls which enable good customer outcomes and the identification/mitigation of poor practice.

The Group operates a devolved compliance function which utilises the compliance functions of each of the relevant operating businesses. The role of each compliance team is to ensure that the operating business meets the regulatory requirements in the jurisdictions in which it does business. This is overseen at Group level by the Group Head of Risk and Compliance who reports to the Group CFO and the Chairman of the ARCC.

B.5 INTERNAL AUDIT FUNCTION

Internal Audit is an integral part of the Group's system of Internal Control and provides independent and objective assurance over the design and effectiveness of controls in place to manage the key risks impacting the Group.

The GIA function is independent of the operational business activities and is not involved directly in revenue generation or in the management and financial performance of any business line. Internal Auditors have neither direct responsibility for, nor authority over, any of the activities reviewed, nor do their review and their appraisal relieve other persons in the Group of responsibilities assigned to them. Internal auditors are not responsible for developing, revising or installing systems, policies or procedures, or for appraising an individual's performance in relation to the operations that are being audited.

The GIA function is led by the GHoIA, who reports to the Chairman of the ARCC. The Head of Internal Audit ("HoIA") for each operating businesses reports to the relevant AC. The GIA function is responsible for regularly assessing the adequacy of the system of internal control of the Utmost Group and its operating businesses, and reporting its findings to the relevant boards (via their ACs). Internal Audit personnel report directly to the GHoIA, with each HoIA having a dotted reporting line, for administrative purposes, to the operating business CEO.

Internal Audit activity is carried out based on the framework of risk based annual audit plans that are prepared and submitted for review and approval by the appropriate Group or operating business AC. Upon approval, the GHoIA distributes the plan to Executive business leaders and executes the plan during the audit plan period. Additionally, at the GHoIA's discretion or at the request of an AC or member of senior management, other unannounced audits may be completed.

The Internal Audit charter defines the framework for the activities of the Group Internal Audit function and is approved by the relevant entity Boards (via their ACs). The GHoIA prepares a quarterly report for the Group and operating business ACs.

The internal audit reporting structure and the charter allow the GIA function to be independent of the functions audited; and it provides the GIA function full, free, and unrestricted access to all operations, records, property, and personnel. Additionally, it provides the authority to allocate resources, set frequencies, select subjects, determine scope of work, and apply the techniques required to accomplish audit objectives.

During their audit planning process the internal audit team review the entire risk universe and identify the highest-risk items that need to be covered by risk-based audits. They also identify processes which, although not necessarily constituting significant risks, still need to be reviewed on a cyclical basis to ensure that the audit process achieves sufficient breadth of coverage. Throughout the audits themselves, the internal audit team identifies potential key risks and examines how effectively they are mitigated through assessing the design and operational effectiveness of key internal controls, information systems, governance, risk management and financial reporting. Where appropriate, the internal audit team institutes a program of testing.

B.6 ACTUARIAL FUNCTION

The regulated operating businesses have well-established Actuarial Functions that are led either by the Appointed Actuary or Chief Actuary - actuaries that are certified, where applicable, by local regulators. The Actuarial Functions of the operating businesses are staffed and resourced by appropriately skilled and experienced actuarial professionals. The authorities and responsibilities of the Appointed Actuaries or Chief Actuaries of the operating businesses as set out in Article 48 of the SII Directive are detailed in the local business Actuarial Function policies and entity level SFCRs.

Utmost's Head of Group Actuarial is responsible for reviewing the activities of the operating business actuarial functions and consolidating the operating business results into the Group's financial statements and solvency reports. Overall responsibility for these activities rests with the Group CFO.

The key activities undertaken by the Group Actuarial team are summarised below:

- review of the technical provisions and capital requirements consistent with SII requirements;
- co-ordinate the consolidation of the Group SCR and MCGSCR;
- > support the Group ORSA process;
- > support annual SII reporting for the Group;
- co-ordinate and consolidate Group specific stress and scenario testing;
- monitor the Group's capital position and financial condition to report any findings to the Group CFO and Board;
- review the experience analysis of the operating businesses; and
- review the solvency reporting of the operating businesses.

B.7 OUTSOURCING

B.7.1 OUTSOURCING POLICY

Outsourcing of specific business activities can be used to reduce or controls costs, to free internal resources and capital, and to utilise skills, expertise, and resources not otherwise available in the Group. However, outsourcing such activities may expose the Group to additional risks which need to be identified and managed appropriately.

The Group has established an Outsourcing Management Policy, which requires that a considered approach be taken to outsourcing, designed to ensure that no outsourcing arrangement will be entered into if it would entail unacceptable risk. While an outsourced activity will be performed by an Outsourced Service Provider ("OSP"), the Group recognises that it remains fully responsible for discharging all its obligations when outsourcing any activity or function and must ensure that controls are in place to ensure the service provided is adequately performed. The Group does not permit the outsourcing of a critical or important operational function or activity in such a way as to lead to any of the following:

- materially impairing the quality of the Group system of governance;
- > unduly increasing the level of operational risk;
- impairing the ability of regulators to monitor compliance with regulatory obligations; and
- undermining continuous and satisfactory service to policyholders and other stakeholders.

The Board and senior management of the Group and operating businesses must retain the necessary expertise to manage outsourcing risks and provide oversight of any critical and important outsourcing arrangements.

Each of the operating businesses has outsourcing policies which align with specific local regulations and the key requirements of the Group Outsourcing Management Policy, including:

- > Outsourcing Strategy and Business Justification
- > Responsibility, Skills and Knowledge
- > Negotiation and Contracts
- > Critical and Important OSP arrangements
- > OSP Risk Management
- > OSP Approval
- > Compliance
- > OSP Due Diligence
- > Intra-Group Outsourcing
- > Cross-Functional Outsourcing
- > OSP Monitoring and Management
- > OSP Business Continuity
- > OSP Exit Strategies

UGP has entered into an outsourcing arrangement with a firm of consultants (Wraxall Capital Solutions Limited) in relation to the implementation of IFRS 17.

Material Outsourcing Arrangements

Details of the material outsourcing arrangements of the operating businesses are set out below. All of these providers have entities located within the UK, the EU, the Isle of Man or Guernsey.

Utmost Life and Pensions Holdings Limited and its subsidiaries

ULP has outsourced its investment management to a number of managers, including J.P. Morgan, A.M. Goldman Sachs Asset Management and ABRDN, and its fund accounting to HSBC Securities Services. It has also outsourced its IT function to ATOS. The ULP CFO is the key function holder with responsibility for these arrangements.

Utmost Holdings Isle of Man Limited and its subsidiaries

UL does not have any material third-party outsourcing arrangements. However, it does rely on the services of another company within the Isle of Man group of companies (USL), for the provision of staff, services, and systems for its business activities. There is a service agreement in place to manage this arrangement.

B.7 OUTSOURCING (CONTINUED)

Utmost Holdings Ireland Limited and its subsidiaries

UPE has 10 critical outsource providers, and 4 non-critical service providers. External arrangements are in place between UPE and third Party OSPs such as SS&C, Cuna and Marsh and there are internal intra-group arrangements between Utmost entities in Ireland, the Isle of Man and Guernsey. There is also a service agreement in place with USIL for the provision of staff, services, and systems for its business activities.

UPE's outsourcing team is responsible for conducting due diligence and risk assessment in relation to potential OSPs and arranging for their onboarding. It is also responsible for the ongoing oversight and monitoring of all OSPs, including both critical and non-critical.

Utmost Worldwide Limited and its subsidiaries

UW and its subsidiaries have eight critical external outsource providers. External arrangements are in place between UW and third party OSPs such as Europe Assist, Pangea International Risk Management Services Inc,

Wakely, Canaccord, Willis Towers Watson, Milliman AG and Equiom. There are also internal intra-group arrangements between Utmost entities in Guernsey and Ireland. Utmost Worldwide's operational managers are responsible for conducting due diligence and risk assessment in relation to potential OSPs and arranging for their onboarding. They are also responsible for the ongoing oversight and monitoring of all OSPs, including both critical and noncritical

Quilter International

Quilter International and associated entities have a number of critical outsourced providers as a result of the purchase by Utmost Limited in 2021 namely a transition service arrangement with Quilter International Business Services Limited ("QIBS"), in addition to this outsourcing arrangement other critical outsources are Tata Consulting providing a key administrative platform & HCL along with a number of intra group arrangements. The key intra group arrangement is with QIBS which covers administrative and support services.

B.8 ANY OTHER INFORMATION

No other information on the Group's system of governance is considered material to require disclosure in this section.

THE UTMOST STRATEGIC RISK PROFILE

GROUP STRATEGY

The risk strategy of Utmost Group plc utilises a devolved approach with full risk frameworks in each of the four operating businesses combined with oversight from the Group. Using this approach, risk management is focused directly on where it arises. Group oversight is provided to enable consistency and provide challenge.

EXTERNAL ENVIRONMENT

While easing of COVID-19 restrictions in many jurisdictions may signal a return to a new normality with the potential for growth across markets, there remains the risk of significant disruptions and volatility impacting global markets, operations and global health driven by factors such as new COVID variants, geopolitical conflicts (including Ukraine) and continuing uncertainty in relation to the long-term impacts of Brexit for the UK economy as a whole.

UGP is subject to ongoing stress testing based on extreme market conditions and holds adequate capital and liquidity to withstand such conditions.

The regulatory landscape is expected to evolve over 2022 including planned changes to how the UK regulatory framework for financial services will develop outside the EU. While it is too early to fully determine how this will impact Utmost Group, consultations run by HM Treasury indicate that this is not expected to materially impact the Group.

THE UTMOST CAPITAL RISK PROFILE

Sections C.1 to C.5 contain specific information on the profile of regulatory capital held for the Group and its insurance businesses.

Based on the Standard Formula, the Group had an SCR of £1,110m at 31 December 2021. The table below shows the Group SCR breakdown by risk category (after intra-module diversification) for the Group, including the contribution to the overall Group regulatory capital requirement (Group SCR) for the non-insurance entities.

31 DECEMBER

RISK MODULES	2021 £m	2020 £m
Underwriting risk	791.7	487.7
Market risk	649.2	444.8
Counterparty default risk	60.7	64.0
Total before diversification	1,501.6	996.4
Diversification	(349.4)	(248.1)
Basic solvency capital	1,152.1	748.3
requirement	1,102.1	7 10.0
Operational risk	47.3	33.2
·	•	
Operational risk Loss absorbing capacity of	47.3	33.2
Operational risk Loss absorbing capacity of deferred taxes Loss absorbing capacity of	47.3	33.2 (59.5)

C.1 UNDERWRITING RISK

Underwriting risk arises through exposure to unfavourable operating experience within the Group.

The Group's primary exposure to underwriting risk is associated with life insurance policies, arising from both new and in-force policies. Health underwriting risk arises from the UCS employee benefits business, which is also open to new business, but exposures are limited through the use of reinsurance. There is also a small amount of non-life risk that was acquired as part of an acquisition. The non-life businesses to which the latter risk relates is now closed to new business.

C.1.1 UNDERWRITING RISK EXPOSURE

The underwriting risk exposures for the Group are as follows:

> Lapse Risk

Defined as the change in liabilities due to changes in the exit rates being different than expected. Exits can happen from either the partial or full surrender of a policy. This also includes the risk of a catastrophic event resulting in a mass lapse of policies;

> Expense Risk

Defined as a change in the value of liabilities resulting from changes in the expenses incurred in servicing insurance contracts;

> Longevity Risk

Defined as a change in the value of liabilities resulting from mortality rates being lower than expected leading to an increase in the value of insurance liabilities (i.e. annuities);

Mortality Risk

Defined as a change in the value of liabilities resulting from mortality rates being higher than expected leading to an increase in the value of insurance liabilities (i.e. protection);

Life Catastrophe Risk

Defined as the change in the value of the liabilities, resulting from extreme or irregular events for the life insurance business;

Disability Risk

Defined as the change in the value of the liabilities, resulting from a change in morbidity;

Health Risk

Defined as the change in the value of the liabilities, resulting in the level of health claims being higher than expected; and

Non-life Risk

Defined as the change in the value of liabilities as a result of claims on a closed legacy non-life book.

C.1.2 UNDERWRITING RISK PROFILE

Life underwriting risk is measured through the following approaches:

- the capital requirement for each underwriting risk exposure is calculated using the SII Standard Formula;
- sensitivity testing is performed in respect of material underwriting risks to determine the impact of changes in experience on the value of Own Funds, the SCR, and the Group solvency ratio; and
- scenario testing is performed to measure the potential effect on the Group's solvency position and risk profile of alternative scenarios involving short or long-term changes to one or more of the underwriting risk variables.

The capital requirements for life underwriting risks at 31 December 2021 are set out in the following table:

Life underwriting risk SCR	756.0	446.9	
Diversification within risk module	(125.6)	(85.8)	
Subtotal	881.6	532.7	
Disability risk	2.4	2.5	
Life Catastrophe risk	8.2	8.2	
Mortality risk	19.0	13.8	
Longevity risk	37.2	44.7	
Expense risk	220.9	118.2	
Lapse risk	594.0	345.4	
RISK CATEGORY	2021 £m	2020 £m	
LIFE UNDERWRITING	31 DECEMBER		

The capital requirements for these risks represent losses due to extreme adverse scenarios which would arise approximately once in every 200 years.

The COVID-19 pandemic could lead to increased mortality claims on life assurance policies. Such an event is reflected through life catastrophe risk within the calculation of the life underwriting risk component of the SCR.

Health and non-life underwriting risk is not material and therefore has not been mentioned separately within the underwriting risk section.

C.1 UNDERWRITING RISK (CONTINUED)

C.1.3 UNDERWRITING RISK MANAGEMENT AND MITIGATION

Reinsurance Strategy

The Group has a number of reinsurance objectives including:

- > to provide both balance sheet and income statement protection against material losses and events in accordance with the relevant risk appetite statement;
- > to manage volatility in the financial performance;
- > to provide support to emerging portfolios in new geographic territories or new product lines; and
- > to provide protection against concentrations of risk, particularly on the Group risk portfolio.

The reinsurance arrangements are monitored in relation to the limits and strategy as per the Underwriting Policy and Reinsurance policy and in conjunction with the Group's overall business strategy.

The table below sets out the specific risk management and risk mitigation approaches used in respect of underwriting risk exposures.

RISK MITIGATION	DESCRIPTION
RISK APPETITE	Group Insurance Risk Policy including statements covering the Group's approach towards different insurance and underwriting risks.
ECONOMIC CAPITAL	Economic capital held on the Group's balance sheet in respect of each of its material underwriting risk exposures - derived using the SII Standard Formula approach.
REINSURANCE	Full or partial transfer of underwriting risk to reinsurance counterparties, including the use of longevity-swap arrangements on the Group's in-payment annuities.
ASSUMPTION SETTING	Annual assumption setting exercise to ensure that the assumptions used to determine the Group's Technical Provisions appropriately reflect the current best-estimate of future underwriting experience.
CLAIMS UNDERWRITING	Underwriting to determine the initial or ongoing validity of claims as a result of exclusion clauses, non-disclosure, fraud, etc.
BUDGET REFORECASTING	Regular updates to the Group's business plan and expense budget to ensure forecasts continue to reflect expected experience.
COST CONTROL	Cost control activity to ensure expenditure remains within plan.
RISK MONITORING	Regular senior management and Board level review of the risk measures discussed in Section C.1.2.

Not all of the above risk management and mitigation approaches are used in respect of all of the Group's different underwriting risk exposures.

C.1.4 UNDERWRITING RISK CONCENTRATION

The Group does not have any material concentrations of lapse, expense or mortality risks.

C.2 MARKET RISK

Market risk arises primarily through potential reductions in future fee revenues that are linked to assets under management, leading to a reduction in Own Funds. This could arise due to falls in the value of assets underlying unit-linked funds, as a result of changes in equity, bond and property values, interest rates and foreign currency exchange rates.

The market risk capital requirement of the regulated life entities of the Group is mainly driven by the exposure to market risks from both unit-linked business and in relation to its shareholders funds.

In the case of unit-linked business the Group typically invests the premiums collected in financial instruments but does not bear the market risk directly.

C.2.1 MARKET RISK EXPOSURE

The key market risk exposures for the Group are as follows:

> Equity Risk

A reduction in equity values reducing future fee income arising from a percentage of assets under management. The adverse changes (i.e. falls) in the level of equity prices could also reduce the value of the Group assets and/or increase the value of its liabilities. In practice this is limited to indirect exposure from the income described above and the Group Pension Schemes as shareholder assets are not invested in equities under the Asset Liability Matching ("ALM") policy.

> Interest Rate Risk

Risk of unexpected changes in the level and/or shape of the term structure of risk-free interest rates which can adversely affect the value of Group's assets, liabilities, capital requirements and/or cash flows.

Currency Risk

Where the movement in exchange rates can reduce the value of an asset and hence reduce future fee income. There is also a risk of loss or of adverse change in the Group's financial situation (e.g. decreasing the value of the Group's assets or increasing the value of its liabilities) resulting, directly or indirectly, from fluctuations in the level and in the volatility of foreign exchange rates. The largest direct exposure in the Group is to operations in Ireland where the primary currency is the Euro.

Spread Risk

Defined as the risk of adverse changes in the market value of the assets due to changes in the level and/or volatility of credit spreads. The market value of an asset can decrease because of spreads widening either because the market's assessment of the creditworthiness of the specific obligor decreases, which is typically accompanied by a credit rating downgrade, or because there is market-wide systemic reduction in the price of credit assets.

> Property Risk

Where movements in property values reduce asset values and future fee income arising from a percentage of assets under management.

The most material market risk exposure in terms of risk capital is equity risk (which arises primarily on the Group's significant in-force unit-linked policies). The other material market risks are currency, due to the geographical makeup of the Group and the underlying investments of the policyholders, and spread risk.

C.2.2 MARKET RISK PROFILE

Market risk is measured through the following approaches:

- > the capital requirement for each market risk exposure is calculated using the SII Standard Formula;
- > sensitivity testing is performed in respect of market risks in order to determine the impact of market movements on the value of Own Funds, the SCR, and the Group Solvency Coverage Ratio; and
- scenario testing is performed to assess the impact of a severe economic downturn arising over the business planning period.

The capital requirements for market risks as at 31 December 2021 are set out in the following table:

MARKET RISK CATEGORY	31 DECEMBER	
	2021 £m	2020 £m
Equity Risk	437.6	262.2
Interest Rate Risk	-	27.5
Currency Risk	250.5	153.6
Spread Risk	100.4	112.7
Property Risk	5.3	7.6
Concentration Risk	4.0	4.4
Subtotal	797.8	568.1
· · · · · · · · · · · · · · · · · ·		4400.0
Diversification within risk module	(148.7)	(123.3)
Market risk SCR	649.2	444.8

C.2 MARKET RISK (CONTINUED)

C.2.2 MARKET RISK PROFILE (CONTINUED)

The COVID-19 pandemic initially led to falls in global stock markets, continued downward pressure on interest rates, fluctuations in currency exchange rates and increased corporate bond spreads. These events have direct consequences to the value of Own Funds for the Group as Own Funds includes an allowance for future revenues. The overall impact has been relatively modest with reductions in fee income from annual management charges being offset by the depreciation of the British pound. The impact on the Group solvency position is also limited as movements in the Own Funds generally also result in similar movements in the SCR.

C.2.3 PRUDENT PERSON PRINCIPLE AND INVESTMENT OF ASSETS

The Group's investment policies and practices incorporate the principle of 'Prudent Person'. Accordingly, the relevant Boards require that the investment manager appointed to manage the investment portfolio only invests in assets and financial instruments whose risks the Group can properly identify, measure, monitor, manage, control and report, and appropriately take into account in the assessment of its overall solvency needs performed as part of the ORSA.

The Group uses asset liability matching and currently invests shareholder assets in low risk investments such as government bonds. There are exposure limits for individual counterparties and a Group Investment and Market Risk

The Group complies with the SII requirements relating to the Prudent Person Principle.

C.2.4 MARKET RISK MANAGEMENT AND MITIGATION

The table below sets out the specific risk management and risk mitigation approaches the Group uses in respect of its market risk exposures.

C.2.5 MARKET RISK CONCENTRATION

The Group's market and credit related risk concentrations are covered in Section C.3.4.

RISK MITIGATION	DESCRIPTION
RISK APPETITE	Group Investment and Market Risk Policy including statements covering the Group's approach towards market risk.
ECONOMIC CAPITAL	Economic capital held on the Group's regulatory balance sheet in respect of each of its material market risk exposures - derived using the SII Standard Formula approach.
ASSET LIABILITY MANAGEMENT	The Group actively pursues an asset liability matching strategy.
INVESTMENT GUIDELINES - LIMIT STRUCTURES	The Investment Guidelines for each of the Group's investment portfolios set out limit structures for the assets permitted within each portfolio - market risk is an important factor in the choice of available assets.
CAPITAL MANAGEMENT OF WITH PROFIT SUB FUNDS ("WPSFs")	The Group aims to have the WPSFs standing alone and meeting their own capital requirements (excluding operational risk) - as a result the market risk exposure of the WPSFs is controlled to facilitate this.
RISK MONITORING	Regular senior management and Board level review of the risk measures discussed in Section C.2.2.
FEE STRUCTURE	Fixed fees and charges based on adjusted premium reduce market volatility impacts.

Not all of the above risk management and mitigation approaches are used in respect of all of the Group's different market risk exposures.

C.3 CREDIT RISK

Credit risk is the risk that the Group is exposed to a loss if another party fails to meet its financial obligations to that company.

C.3.1 CREDIT RISK EXPOSURE

The key credit risk exposures for the Group are as follows:

> Default Risk

Defined as the risk of incurring losses because of the inability of a counterparty to honour its financial obligations. Prescribed stresses are applied to model default risk in the bond portfolio (referred to as Credit Default Risk) and default risk arising from the default of counterparties in cash deposits, risk mitigations contracts (including reinsurance) and other types of exposures subject to credit risk (referred to as Counterparty Default Risk); and

> Downgrade Risk

Defined as the risk of counterparties being downgraded, increasing the probability of default leading to additional capital requirements.

C.3.2 CREDIT RISK PROFILE

The Group's credit risk profile is derived from the SII standard formula counterparty risk module.

As at 31 December 2021 the Group SCR for this module was £61m (2020: £64m).

Although the macroeconomic environment recovered in 2021 following the 2020's COVID-19 related downturn, the full implications of the COVID-19 pandemic are not yet known and could potentially result in an increase in credit risk exposure as difficult economic conditions result in reductions in the financial strength of the Group's counterparties. The environment remains challenging in 2022 with significant volatility in equity and rates markets. The evolution of the Russia-Ukraine conflict remains uncertain.

The Group actively monitors the credit worthiness of counterparties and diversifies exposures in order to limit exposure to any one counterparty.

C.3.3 CREDIT RISK MANAGEMENT AND MITIGATION

The table below sets out the specific risk management and risk mitigation approaches the Group uses in respect of its credit risk exposures.

RISK MITIGATION	DESCRIPTION
RISK APPETITE	The Group Credit and Liquidity Risk Policy includes statements covering the Group's approach towards credit risk.
ECONOMIC CAPITAL	Economic capital held on the Group's regulatory balance sheet in respect of each of its material credit risk exposures - derived using the SII Standard Formula approach.
INVESTMENT GUIDELINES - LIMIT STRUCTURES	The Investment Guidelines for each of the Group's investment portfolios include credit related exposure limits which constrain the assets permitted within each portfolio.
ASSET OPTIMISATION	Optimisation of assets within specific portfolios - including the sale of assets which result in a disproportionate or unwanted level of exposure to credit spread risk or concentration risk relative to the objectives of those portfolios.
MATCHING ADJUSTMENT	Adherence to the requirements necessary to maintain approval to use the MA, which includes close Asset Liability Management.
RISK MONITORING	Regular senior management and Board level review of the risk measures discussed in Section C.3.1.

Not all of the above risk management and mitigation approaches are used in respect of all of the Group's different credit risk exposures.

The Group does not anticipate making any material changes to its current approach to managing and mitigating its credit risk exposures. In particular, it currently has no plans to either introduce any new or stop using any existing risk mitigation practices.

C.3.4 CREDIT RISK CONCENTRATION

The Group has substantial holdings (£93m) in UK government issued assets (i.e. gilts). However, these assets are considered to be risk-free. As such, the Group does not consider that these exposures pose a material concentration of risk.

The Group's shareholder assets are well diversified. Therefore, the credit risk concentration on financial assets is immaterial.

C.4 LIQUIDITY RISK

Liquidity risk is the risk that the Group, although solvent, does not have available sufficient financial resources to enable it to meet its obligations as they fall due, or can secure them only at excessive cost.

C.4.1 LIQUIDITY RISK EXPOSURE

Liquidity monitoring is completed by each of the life insurance entities using the Group's prescribed methodology. Group liquidity forecasting and budgeting is also considered with management information provided to

When considering liquidity risks, one of the key elements within UPE is the Italian Withholding Tax Asset ("WTA"). The WTA is a prepayment (£109m as at 31 December 2021) of policyholder capital gains tax that UPE makes to the Italian Revenue. UPE can reclaim it either from:

- > deductions from future payments to the Italian Revenue via the 5 year offset mechanism; or
- > by way of deduction of tax at source from payments to policyholders, where the payment includes capital gains made by policyholders.

C.4.2 LIQUIDITY RISK PROFILE

Liquidity risk is not one of the Group's primary risk exposures on the basis that:

- > liquidity in each entity is regularly monitored, including under stress:
- > across the Group there is significant liquidity; and
- > the Group's in-payment annuities, which form the bulk of the non-linked contracts in force, may not be surrendered or transferred at the policyholder's option.

There are other policies which do include the right to surrender or transfer the policy on demand, with the surrender or transfer value calculation method being determined by the policy conditions. However, the majority of such contracts are unit-linked, where the liabilities are matched by assets held in internal linked funds.

C.4.3 LIQUIDITY RISK MANAGEMENT AND MITIGATION

The Group has an active liquidity risk management process. The table below sets out the specific risk management and risk mitigation approaches the Group uses in respect of its exposure to liquidity risk.

RISK MITIGATION	DESCRIPTION
RISK APPETITE	The Group Credit and Liquidity Risk Policy includes statements covering the Group's approach towards liquidity risk.
CLOSE ASSET LIABILITY MATCHING	The Group has a process in place to ensure its asset holdings are appropriate to the nature, term, currency, and liquidity of its liabilities.
INVESTMENT GUIDELINES - LIMIT STRUCTURES	The Investment Guidelines for each portfolio set out limit structures for the assets permitted within the portfolio - liquidity risk is an important factor in the choice of available assets.
MONITORING	The Group reports liquidity metrics to the Board.

The Group does not anticipate making any material changes to its current approach to managing and mitigating its liquidity risk. In particular, it currently has no plans to either introduce any new or stop using any existing risk mitigation practices.

The Group's shareholder assets are well diversified. There is not a significant exposure to a single named counterparty and therefore, the credit risk concentration on financial assets is immaterial.

C.4.4 EXPECTED PROFIT INCLUDED IN FUTURE PREMIUMS ("EPIFP")

The Group calculates EPIFP in accordance with the requirements of Article 260 of the SII Delegated Acts. The regulation stipulates that the EPIFP shall be set equal to the difference between:

- 1. The Best Estimate Liability ("BEL") calculated in accordance with the SII requirements.
- 2. A BEL calculated under the assumption that future premiums are not received for any reason other than the insured event having occurred (i.e. all policies are effectively treated as paid up at the valuation date).

EPIFP is calculated separately for different Homogenous Risk Groups ("HRGs"), provided that grouped contracts are also homogenous in relation to EPIFP. Within the same HRG, profit-making policies are used to offset loss-making policies.

As at 31 December 2021, the value of the Group's total EPIFP was £18m (2020: £19m), the vast majority of which was from unit-linked business.

C.4.5 LIQUIDITY RISK CONCENTRATION

There is no significant concentration of liquidity risk in the Group.

C.5 OPERATIONAL RISK

Operational risk is the risk of loss arising from inadequate or failed internal processes, personnel, or systems, or from external events. Losses from events such as fraud, litigation, damages to premises, cyber-attacks, and failure to comply with regulations are therefore covered in the definition.

C.5.1 OPERATIONAL RISK EXPOSURE

The key operational risk exposures for the Group arising from failures on the part of our employees or from inadequate internal processes or systems. The definition of operational risk includes compliance risk and financial and reporting risk. Operational risks can be generated by:

People

Human errors, fraud, unmanaged staff turnover, overreliance on key personnel, unmatched skills to job requirements and inadequate management oversight;

> Internal Processes

Failure in the design and execution of core insurance and support processes such as sales and marketing, underwriting, policy issuance, customer billing and premium collection, reinsurance placement, claims payments, actuarial reserving, and outsourcing processes;

Systems

Inadequate data and security protections, weak access controls, unstable and overly complex systems, lack of adequate testing prior to production, deficient systems/ tools; and

External Events

Natural disasters (floods, fires, earthquakes, etc.) as well as man-made disasters (terrorism, political and social unrest) that may impact the ability to operate on an ongoing basis; changes in the regulatory environment including new regulations.

C.5.2 OPERATIONAL RISK PROFILE

As at 31 December 2021 the Group SCR for this module was £47m (2020: £33m).

Throughout 2021 the most significant risk that the Group's operational businesses faced was the COVID-19 pandemic. This brought with it challenges due to financial market volatility, impacts on customers and the operational impacts of administering business. The Group's Business Continuity procedures have helped and continue to help to ensure that our people and technical resources can work remotely, in order to minimise the impact on operational activity and ensure that we are able to provide essential services to our customers. We continue to be focused on the health and well-being of our customers and staff, following all the recommendations and measures made by local Governments to reduce the spread of COVID-19.

C.5 OPERATIONAL RISK (CONTINUED)

Although the precise steps taken vary from location to location, the Group has implemented the following measures to protect our people, to serve our customers and to minimise business disruption:

- > Business continuity plans are maintained and were successfully carried out across the Group with a large majority of the Group working remotely for a period;
- > Working with outsourcers to ensure continuity of service;
- > Utmost Technical Academy seminars have adapted to become virtual seminars, with Utmost continuing to provide additional value to its stakeholders; and
- > Accelerated automation of a number of processes has enabled a greater number of tasks to be undertaken remotely.

There has, and continues to be, an increased focus on operational risk as conditions continue to evolve. However, with the successful implementation of business continuity and advancements in remote processes there is more certainty in the Group's ability to deliver in these circumstances.

C.5.3 OPERATIONAL RISK MANAGEMENT AND MITIGATION

The table below sets out the specific risk management and risk mitigation approaches the Group uses in respect of its operational risk exposures.

C.5.4 OPERATIONAL RISK CONCENTRATION

Given the wide scope of operational risk, any concentration of operational risk is monitored and managed using the details in Sections C.5.3.

RISK MITIGATION	DESCRIPTION
RISK APPETITE	The Group Operational Risk Policy including statements covering the Group's overall approach towards operational risk.
INDIVIDUAL CONTROLS	Individual controls applied to specific operational activities.
CONTROL PROCESSES	Operational controls in place to manage operational risks.
CONTROL POLICIES	Record of the objectives, processes, responsibilities, and reporting procedures in respect of the Group's operational controls.
MANAGEMENT AND MONITORING	Review of Operational Risk Reporting and Management Information, including regular senior management and Board level review of the risk measures discussed in Section C.5.1.
COMPLIANCE MONITORING	Risk and Compliance reviews of operational processes.
ROOT CAUSE ANALYSIS	The Group investigates business incidents and any complaints that have been upheld, to ensure the root causes have been identified and mitigating actions are implemented.
ASSURANCE	Reviews of operational areas by Group Internal Audit.
ECONOMIC CAPITAL	Economic capital held on the Group's regulatory balance sheet in respect of the Group's overall exposure to operational risk - derived using the SII Standard Formula approach.

Not all of the above risk management and mitigation approaches are used across all of the Group's individual operational risk exposures.

C.6 OTHER MATERIAL RISKS

C.6.1 BUSINESS RISK

In addition to the other risk categories articulated in Sections C.1 to C.5, the Group identified a number of business related risks during 2021 which primarily relate to the reorganisation leading to the creation of UGP, a UK holding company that consolidates the Utmost Group.

C.6.1.2 BUSINESS RISK MEASURES

The most material business risks are identified using an expert judgement and relative basis and form part of the Group's risk reporting.

C.6.1.3 BUSINESS RISK MANAGEMENT AND **MITIGATION**

The table below sets out the specific risk management and risk mitigation approaches the Group uses in respect of its exposure to business risk.

RISK MITIGATION	DESCRIPTION
RISK OVERSIGHT	Management and monitoring of individual business risk exposures, with consideration of appropriate management action.
RISK CONTROLS	Individual controls applied to specific business processes or in respect of specific business risks, these are documented in the Group's risk reporting.

C.6.1.4 BUSINESS RISK CONCENTRATION

mitigating its business risk.

The Group does not currently carry out any formal investigation into or analysis of concentrations of business risk.

C.6.2 CLIMATE RISK

The Group has made its first TCFD disclosure in the UGP 2021 Annual Report. The report sets out the Group's governance, risk management, strategy and metrics around climate-related financial disclosures.

The Group is developing a climate risk framework to ensure consideration of climate risk is embedded across the business. The framework encourages each of the three lines of defence to consider climate risk in their business-as-usual operations. The climate risk framework is being embedded across the Group. This embedding is not limited to risk management processes but will be incorporated into the day-to-day management of the business. The Group's culture is such that employees are encouraged to consider the climate impacts of their business function and decision making.

The Group has elected to take an integrated approach to climate risk and considers it as a causal affect for how other risks may impact on the business. The Group recognises the increased focus of regulators as well as the increasing expectations of employees and policyholders to carefully manage climate risk. As such the Group's focus is increasing and the Group is ensuring it is adequately resourced to manage this risk area.

C.7 ANY OTHER INFORMATION

C.7.1 RISK SENSITIVITY ANALYSIS

Scenario testing and sensitivity testing are performed on an annual basis to assess the resilience of the Group to potential stresses and scenarios. The table below sets out the main tools to measure its risks.

MEASUREMENT TOOL	MEASURE
STRESS TESTING	Impact on the Group's Own Funds of a 99.5th percentile one-year level change in the risk variable(s) corresponding to each underwriting risk - carried out using the SII Standard Formula calibration.
SCENARIO TESTING	Potential effect on the Group's solvency position and risk profile of alternative scenarios involving short or long-term changes to one or more of the Group's underwriting risk variables.
SENSITIVITY TESTING	Impact on the Group's solvency position and economic value of changes in the risk variable(s) corresponding to underwriting risks.
EXPERIENCE ANALYSIS	Comparison of recent demographic and expense experience with historic internal experience, wider industry experience, and current best-estimate assumptions
EXPERIENCE MONITORING	Quarterly / monthly review of recent experience.
BUDGET ANALYSIS	Comparison of recent experience with budgeted or forecast amounts.
PORTFOLIO REPORTING	Measures and metrics contained within the Group's asset and investment reports which cover its asset portfolios, ALM management, and hedging activity.
MARKET MONITORING	Market performance and risk variables such as interest rates, equity indices, spreads, and volatility indices.

Not all of the above risk measures are used to measure all of the Group's different risk exposures.

As at 31 December 2021, the Group's surplus capital in excess of the SCR is £855m. The following table shows the change in the value of Own Funds and SCR due to key sensitivities.

SENSITIVITY TEST	IMPACT ON (OWN FUNDS	IMPACT ON S	SCR	IMPACT ON TI COVERAGE RA	
	2021 £m	2020 £m	2021 £m	2020 £m	2021 %	2020 %
Interest rates +100bps	50.7	6.5	(24.2)	(19.3)	9%	6%
Interest rates -100bps	(71.2)	(23.9)	20.1	27.0	(9%)	(10%)
GBP appreciation (20%)	(144.1)	(54.0)	(119.3)	(63.2)	7%	10%
Equity & Property -40%	(276.9)	(201.8)	(242.2)	(142.6)	17%	11%
Mass Lapse (40%)	(489.5)	(213.2)	(361.3)	(207.8)	20%	35%
Expenses +10%	(111.8)	(70.5)	(2.7)	(0.3)	(10%)	(10%)
Credit spread +200bps	(78.3)	(63.6)	(28.0)	(18.5)	(3%)	(4%)
Inflation +200bps	(109.2)	-	68.1	-	(20%)	-

VALUATION REQUIREMENTS OF ASSETS AND LIABILITIES FOR **SOLVENCY II**

SII regulations require assets and liabilities to be valued in accordance with the provisions of Articles 75 to 86 of the SII Directive and related guidance, which effectively state that assets and liabilities should be valued on a market-consistent fair value basis, being the amount for which they could be exchanged between knowledgeable willing parties in an arm's length transaction.

The Group uses as its starting point its IFRS balance sheet, based on the accounting policies and methodologies set out in the UGP 2021 Annual Report, and adjusts where needed (as described in this section) to provide a market-consistent economic balance sheet. SII values assets and liabilities based on quoted market prices in actively traded markets. For assets and liabilities not traded in active markets, quoted market prices for similar assets and liabilities are used where available, and in cases where there are no similar assets or liabilities, alternative valuation methods are applied.

The value of the technical provisions is calculated in line with SII rules as the sum of the technical provisions calculated as a whole, including BEL and the Risk Margin.

CONSOLIDATION APPROACH

The Group prepares its consolidated SII balance sheet in accordance with 'Method 1', the accounting consolidation-based method ('default method'). This requires the calculation of Group solvency to be based on consolidated data, with the consolidation approaches for SII and IFRS respectively set out in the table below.

A full list of the entities within the scope of the Group as at 31 December 2021 is set out in the in Group QRT S.32.01.22 in Appendix F.1.7, where the type of undertaking is specified for each entity and the level of ownership and control by the Group.

Non-insurance entities (other financial sector undertakings and other non-financial undertakings) are included as participations in the Group SII balance sheet and are therefore not consolidated on a line-by-line basis. Non-insurance entities comprise of Utmost Portfolio Management Limited ("UPM"), Utmost Worldwide (DIFC) Limited, Utmost Trustee Solutions Limited ("UTSL"), Quilter International Trust Company ("QITC") and AAM Advisory Pte Limited ("AAM").

A summary of the principal Group entities within each category is shown for ease of reference below.

TYPE OF UNDERTAKING	RELATED UNDERTAKINGS WITHIN THE GROUP	SII APPROACH	IFRS APPROACH
Insurance or reinsurance undertaking, insurance holding company or mixed financial holding company	Utmost Limited (IOM) Utmost Worldwide Limited (Guernsey) Utmost PanEurope dac (Ire) Utmost Life and Pensions Limited (UK) Utmost Bermuda Limited (BM) Quilter International Isle of Man Limited (IOM) Quilter International Ireland dac (Ire) Holding companies of the insurance entities (IOM/Gsy/Ire/UK)	Full consolidation on a line-by-line basis, using SII valuation basis.	Full consolidation on a line-by-line basis if the undertaking is controlled by the Group, using IFRS valuation basis.
Ancillary service undertakings	Utmost Services Limited (IOM) Quilter International Business Services Limited (IOM) Utmost Services Ireland Limited (Ire) Utmost Life and Pensions Services Limited (UK) Quilter International Middle East Limited (AE)	Full consolidation on a line-by-line basis, using SII valuation basis.	Full consolidation on a line-by-line basis if the undertaking is controlled by the Group, using IFRS valuation basis.
Other financial sector undertakings	Utmost Portfolio Management Limited (Gsy) Utmost Worldwide (DIFC) Limited (AE) Utmost Trustee Portfolio Solutions Limited (IOM) Quilter International Trust Company Limited (IOM) AAM Advisory Pte Limited (SG)	Included using the sectoral valuation basis, taking into account the Group's ownership percentage.	Valued on the basis of the Group's proportional share of the undertaking's Own Funds (100%) calculated in accordance with the relevant sectoral rules.

CONSOLIDATION APPROACH (CONTINUED)

The Group's SII balance sheet as below as at 31 December 2021 shows the comparison between assets and liabilities under IFRS and SII.

SUMMARY BALANCE SHEET fm	REF.	IFRS	SII ADJUSTMENTS	REALLOCATIONS	2021 SII	2020 SII
ASSETS						
Goodwill and intangible assets	D.1.1	1096.6	(1,096.6)	-	-	-
Contract costs	D.1.2	58.4	(58.4)	-	-	-
Pension benefit surplus	D.3.6	3.0	-	-	3.0	-
Property plant and equipment held for own use	D.1.3	27.2	(1.3)	-	25.9	20.7
Investments (other than assets held for index-linked and unit-linked contracts)	D.1.4	2,081.6	195.6	5.4	2,282.6	2,313.8
Holdings in related undertakings	D.1.5	-	3.2	-	3.2	1.3
Assets held for index-linked and unit-linked contracts	D.1.6	61,970.4	0.2	8.0	61,978.5	35,079.1
Loans and mortgages	D.1.7	172.4	-	0.7	173.1	0.8
Reinsurance recoverables	D.1.8	1,188.0	(123.0)	-	1,065.1	1,151.9
Deposits to cedants	D.1.9	-	-	-	-	-
Insurance and intermediaries receivables		40.1	-	-	40.1	37.6
Reinsurance receivables		23.1	-	1.1	24.2	31.0
Receivables (trade not insurance)		123.5	(20.6)	14.5	117.4	140.4
Cash and cash equivalents	D.1.10	452.2	(200.0)	-	252.2	269.4
Any other assets, not elsewhere shown	D.1.10	67.4	(11.0)	(29.8)	26.5	33.5
Total assets		67.303.9	(1,311.8)	(0.2)	65,991.9	39,079.5
LIABILITIES						
Technical provisions for investment contract liabilities	D.2.4	59,983.2	(1,760.2)	3,133.2	61,356.2	35,152.9
Liabilities under insurance contracts*	D.2.4	4,796.3	489.5	*(3,167.0)	2,118.8	2,189.3
Provision other than technical provisions		2.8	(0.1)	2.0	4.6	4.6
Unallocated surplus	D.3.1	107.3	(107.3)	-	-	-
Subordinated liabilities	D.3.2	404.7	(2.8)	(4.7)	397.2	300.0
Deferred tax liability	D.3.3	57.8	10.8	-	68.6	53.5
Pension benefit obligation	D.3.4	1.4	-	-	1.4	2.3
Other liabilities	D.3.7	500.4	(87.6)	36.3	449.2	399.4
Total liabilities		65,853.9	(1,457.7)	(0.2)	64,396.0	38,102.0
Excess of assets over liabilities		1,450.0	145.9	-	1,595.9	977.5

^{*}The £3,167m reclassification from 'Liabilities under insurance contracts' to 'Technical provisions for investment contract liabilities' relates to unit-linked with-profits insurance business written by the Group, as presented in Section D.2.1 which is classified within Technical provisions - Index linked and unit-linked in the SII balance sheet S.02.01.02 as shown in Appendix F.1.1.

D.1 ASSETS

The section below describes the main valuation bases and assumptions applied in calculating the material items as presented on the Group's SII balance sheet.

Assets have been valued according to requirements of the SII Directive and related guidance. The basis of the SII valuation principle is the amount for which the asset could be exchanged between knowledgeable and willing parties in an arm's length transaction.

The description of valuation differences between SII and IFRS balance sheets, by material class, are provided below.

D.1.1 GOODWILL AND INTANGIBLE ASSETS

Under SII rules, goodwill is valued at nil. Intangible assets are fair valued to the extent there is available market information; the Group's valuation of intangible assets at 31 December 2021 is nil (2020: nil). For the Group's acquired value of in-force business ("AVIF"), which is shown as an asset under IFRS reporting, any future cash flows associated with the emergence of profit on the in-force business are included within the calculation of the SII technical provisions.

D.1.2 CONTRACT COSTS

Under SII rules, deferred acquisition costs ("DAC") and contract costs are valued at nil, and similar to the AVIF detailed above, any future cash flows relating to historical acquisition costs are included within the calculation of the SII technical provisions.

D.1.3 PROPERTY, PLANT AND EQUIPMENT HELD FOR OWN USE

The Group values property, plant and equipment based on its IFRS valuation basis, adjusted for any material differences in deriving fair value. Following the adoption of IFRS 16 'Leases' on 1 January 2019, this category includes

the capitalised 'right of use' ("ROU") asset in respect of lease agreements (principally leased office space), for which the Group assesses the IFRS valuation for any material differences in determining the fair value of the ROU asset. A corresponding lease liability, representing the discounted cash flows in respect of lease payments, is included within 'Other liabilities'. Refer to Section D.1.11 for details of ROU assets.

D.1.4 INVESTMENTS (OTHER THAN ASSETS HELD FOR INDEX-LINKED AND UNIT-LINKED CONTRACTS)

The majority of the Group's investment portfolio is measured at fair value for the IFRS balance sheet, as required under IFRS 9 'Financial Instruments' and IFRS 13 'Fair Value Measurement', based on quoted market prices in actively traded markets. No significant estimates or assumptions are applied by the Group as at 31 December 2021.

D.1.5 HOLDINGS IN RELATED UNDERTAKINGS, INCLUDING PARTICIPATIONS

This balance comprises holdings in related undertakings that are not fully consolidated. In the IFRS financial statements, the Group consolidates all entities on a line-by-line basis.

Under SII, due to the different consolidation approach, subsidiary undertakings outside the insurance consolidation group are not fully consolidated. These undertakings comprise of other financial sector undertakings of £3.2m (2020: £1.3m).

UPM, Utmost Worldwide (DIFC) Limited, UTSL, QITC and AAM are the only other financial undertakings within the Group. Holdings in other financial undertakings are measured at fair value. In cases where a market price (using listed quoted prices from a recognised stock exchange) is not available, the adjusted equity value is used. The adjusted equity value is calculated by multiplying Utmost's

D.1 ASSETS (CONTINUED)

ownership percentage (100%) by the entity's IFRS net asset after certain adjustments including the deduction of any goodwill or other intangible assets, in accordance with the relevant sectoral rules.

D.1.6 ASSETS HELD FOR INDEX-LINKED AND UNIT-LINKED CONTRACTS

IFRS does not separately classify assets held to cover linked liabilities. In the Group financial statements, these assets are classified in the balance sheet under the relevant asset line (such as equities or bonds). Under SII £196m of these assets, representing linked policyholder investments, are reclassified, and reported in one line in the balance sheet as "Assets held for index-linked and unit-linked contracts".

Under SII, assets held to cover linked liabilities are valued on the same basis as IFRS. Valuation is largely on the basis of quoted market prices. The increase in assets over 2021 is mainly due to the acquisition of Quilter International. Certain assets (totalling £1,796m (2020: £273m)) are valued using alternative valuation methods. Refer to Section D.4 for further details.

D.1.7 LOANS ON POLICIES

The majority of loans on the SII balance sheet are policyholder loans. These are held at cost (the amount borrowed) as an approximation of fair value. Loans on policies had an aggregate value of £173m (2020: £0.8m).

D.1.8 REINSURANCE RECOVERABLES

Reinsurance recoverables are calculated on a basis consistent with gross best estimate liabilities i.e. taking a probability-weighted average of discounted future cash flows, adjusted for expected credit losses due to counterparty default.

D.1.9 RECEIVABLES (TRADE, NOT INSURANCE)

This category includes the WTA within UPE. The WTA represents a 'tax prepayment' relating to prepaid withholding tax in relation to unit-linked business sold by UPE to Italian policyholders on a 'Freedom of Services' basis. The amount prepaid to the tax authority is based on a percentage of total mathematical reserves for the Italian business (currently 0.45%) and is paid each June subject to a cap of a specified percentage (currently 1.8%) of reserves in respect of Italian policies. The tax prepayment is recovered over time via several methods, including reclaiming tax directly from policyholders who elect to surrender their policy, or alternatively reducing the amount paid to the Italian tax authority in future periods, using specific rules which allow the prepayment to be reduced based on amounts paid 5 years beforehand. There is no valuation difference under SII and IFRS.

Other receivables are accounted for at amortised cost less impairment. This approximates to fair value due to the short-term nature of the balances. This valuation basis applies equally to both IFRS and SII.

There are no SII adjustments to remove inadmissible assets from the SII balance sheet.

D.1.10 CASH AND CASH EQUIVALENTS

Cash and cash equivalents are held at amortised cost on an IFRS basis, which is deemed as an appropriate measure of fair value for SII purposes. As noted in Section D.1.6. above, under IFRS any assets held to cover linked liabilities are classified separately within their respective balance sheet lines; and accordingly, for SII purposes, any cash and cash equivalents which are backing linked liabilities (in other words, policyholder cash balances) are reclassified to the 'Assets held for index-linked and unit-linked contracts' line.

D.1.11 LEASING (RIGHT OF USE ASSETS)

Under IFRS, where the Group acts as a lessee, it recognises a ROU asset and a corresponding lease liability, representing the obligation to make lease payments.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of fixed payments, less any incentives receivable under the lease. Lease payments in relation to options to terminate are only included in the measurement of the liability if it is reasonably certain that the option will not be exercised, otherwise payments following the option to terminate will not be included. The asset is initially measured at cost which comprises the amount of the lease liability, and lease payments made at or before the commencement date, any initial direct costs incurred and an estimate of the costs related to the dilapidation of the asset that would be incurred, less any lease incentives received. The asset is subsequently measured at cost less depreciation.

Under SII, a fair valuation is required to be used. The value produced using the IFRS 16 valuation methodology is considered to provide a materially accurate approximation for the fair value required under SII. At 31 December 2021, the ROU asset has a SII valuation of £18m and is included within property, plant, and equipment.

D.2 TECHNICAL PROVISIONS

D.2.1 TECHNICAL PROVISIONS BY LINE OF BUSINESS

This section considers the technical provisions in the consolidated Group SII balance sheet for UGP (£63,475m) which consists of the technical provisions of the following entities under the consolidated insurance Group under Method 1:

- > Utmost Life and Pensions Limited
- > Utmost Worldwide Limited
- Utmost Limited
- > Utmost PanEurope dac
- > Utmost Bermuda Limited
- > The Equitable Life Assurance Society
- > Quilter International Isle of Man Limited
- Quilter International Ireland dac

The value of the technical provisions is calculated in line with SII requirements as the sum of technical provisions calculated as a whole, the BEL and the Risk Margin.

Technical provisions calculated as a whole are calculated as the component of technical provisions whose value was determined on the basis of the market value of replicating financial instruments in accordance with Article 77(4) of the SII Directive.

TYPE OF UNDERTAKING AS AT 31	TECHNICAL PROVISIONS CALCULATED AS A WHOLE		BEST ESTIMATE LIABILITY		RISK M	ARGIN	TOTAL TECHNICAL PROVISIONS	
DECEMBER £m	2021	2020	2021	2020	2021	2020	2021	2020
Life: Unit-Linked and Index-Linked Insurance	62,514.8	35,627.8	(1,587.7)	(689.3)	429.1	214.5	61,356.2	35,152.9
Non-Life: Other	-	-	59.5	80.6	5.9	-	65.4	80.6
Life: Insurance including profit participation	253.4	74.3	1,550.2	1,773.7	60.5	69.1	1,864.1	1,917.1
Health Insurance	-	-	188.0	190.2	1.3	1.4	189.3	191.5
Total Group technical provisions	62,768.2	35,702.1	210.0	1,355.2	496.8	285.0	63,475.0	37,342.2

The Group's SII technical provisions have increased over 2021 mainly due to the acquisition of Quilter International, positive net client cash flow and market movements affecting the linked policyholder assets. There have been no methodology changes to the calculation of the Group's SII technical provisions following the acquisition of Quilter International.

The SII technical provisions have three components:

- > Technical provisions calculated as a whole of £62,768m (2020: £35,702m). This represents the value of units credited to policyholders as at 31 December 2021.
- BEL of £210m (2020: £1,355m). The BEL corresponds to the probability-weighted average of future cash flows, including policyholders' benefit payments, expenses, taxes and premiums related to existing insurance and reinsurance contracts, taking into account the time value of money (i.e. by discounting these future cash flows to present value). The calculation of the BEL is based upon up-to-date reliable information and best estimate assumptions.
- A Risk Margin of £497m (2020: £285m). In line with SII requirements, the Group calculates the Risk Margin by determining the expected cost of providing capital to cover the non-hedgeable part of its SCR over the remaining lifetime of the inforce business.

D.2 TECHNICAL PROVISIONS (CONTINUED)

D.2.2 BASES, METHODS AND MAIN ASSUMPTIONS USED FOR TECHNICAL PROVISIONS

The assumptions and methodology for the Group's BEL and Risk Margin are set out in the following sections.

D.2.2.1 Methodology applied in deriving the best estimate liabilities

The BEL is defined as the probability-weighted average of future cash-flows, taking account of the time value of money (expected present value of future cash flows), using the relevant risk-free interest rate term structure.

The projected future cash flows include:

- > Regular premium receipts;
- > Claims payments with an allowance for an early surrender charge;
- > Expenses;
- > Commissions;
- > Policyholder benefit payments;
- > Costs associated with the WTA;
- > External fund charges; and
- > Profit share payments.

These cash flows are then discounted using the relevant riskfree rates provided to obtain the BEL.

The calculation of the best estimate liability allows for any boundaries of the insurance contract. At the contract boundary date all future premiums beyond that point are excluded as are any obligations that would have accrued on these additional premiums. However, obligations due to premiums before this date are recognised. The primary restriction from contract boundaries occurs to the UCS (Group Life and Disability) business where premiums are typically paid annually. Although annual retention levels are significant no future premiums are included beyond the premium paying term unless a guarantee is in place.

D.2.2.2 Methodology applied in deriving the Risk Margin

The Risk Margin is determined as the present value of the cost of the non-hedgeable solvency capital requirements (at 6% per annum) needed for the full run off of the in-force liabilities, discounted using the prescribed SII termdependent risk-free interest rates.

All standalone non-hedgeable SCRs are projected forward individually using the appropriate risk drivers. Diversification benefits between the standalone risks are allowed for in each future projection period.

D.2.2.3 Assumptions applied in deriving the best estimate liabilities and the Risk Margin

For the Group, the key areas of uncertainty relate to the items listed below:

- > Life and health underwriting risk, which includes policyholder behaviour, mortality, longevity and morbidity experience;
- > Market conditions, including change in equities, foreign exchange rates and credit spreads; and
- > Future expenses incurred in servicing insurance obligations, including administrative, investment and claims management expenses plus provision for related overheads.

Expenses

Expenses include administrative, investment management, claims management and acquisition expenses which relate to recognised insurance and reinsurance obligations. The assumptions underlying expense projections are consistent with the Group strategy, taking into account future new business and any change in expenses as decided by management.

In setting the expense assumptions, the Group has used its view on the expected future costs. The sensitivity of the Group to changes in expenses can be seen in the unaudited Section C.7.

Provision for future expenses: assumptions

The expenses contain a degree of uncertainty in relation to the future development of the business. The assumptions used to determine the SII Technical Provisions and SCR have been set by each operating company based upon the business plan taking into account new business volumes but not any benefits arising from future acquisitions. No allowance has been made for expected synergies arising from the Quilter International acquisition that have not yet been delivered.

Best estimate liabilities

The BEL correspond to the probability-weighted average of future cash flows as listed in D.2.2.1, taking into account the time value of money (i.e. by discounting these future cash flows to present value). The calculation of the BEL is based upon up-to-date reliable information and realistic assumptions. The BEL is recognised on a gross of reinsurance basis, without deduction of amounts recoverable from reinsurance contracts. The cash flows are discounted using the SII basic risk-free term structure of interest rates applying at the valuation date to calculate the BEL. For the MA portfolios (described in Section D.2.5), the corresponding MA is added to the basic risk-free curve at all durations.

D.2 TECHNICAL PROVISIONS (CONTINUED)

Underwriting Assumptions

Assumptions are set based on historical experience and comparison to external data sets where available. The most material assumption for UGP is persistency. Detailed reviews for persistency occur annually with progress monitored more regularly in management information. All relevant available information is taken into account and judgement is applied to determine any step changes in policyholder behaviour. Persistency assumptions are set at a granular level to identify behavioural differences such as sales channel and premium information. Although to a lesser extent and further mitigated by reinsurance arrangements longevity assumptions are also set using a very similar process. Longevity assumptions utilise standard industry tables that are then parametrised to reflect specific Utmost exposures.

Manual reserves

The Group determines the value of certain liabilities (referred to as 'manual reserves') outside of its policy level cash flow projection model. The cash flows determined in respect of each manual reserve are imported into the model so that they can be included in the final BEL calculation as appropriate.

Risk Margin

The Risk Margin is defined as the cost of non-hedgeable risk, i.e. a margin in addition to the expected present value of liability cash flows required to manage the business on an ongoing basis. It is the aggregation of the SII Risk Margin for each operating entity with no allowance for diversification between entities. The Risk Margin for each operating entity is deemed to be the present value of the cost of future capital requirements for non-hedgeable risks. A best estimate assumption is defined as one where there is the same probability that the actual experience develops more or less favourably than the assumption. It is neither a prudent nor an optimistic assumption. It is set at a level that is neither deliberately overstated nor deliberately understated.

In line with SII requirements, the Group calculates the Risk Margin by determining the expected cost of providing capital to cover the non-hedgeable part of its SCR over the remaining lifetime of the in-force business.

The Group assumes that all market risks are hedgeable and therefore excludes them from the SCR used in the Risk Margin calculation. Underwriting, operational and counterparty default risks are considered non-hedgeable.

The SII requirements define a hierarchy of simplifications which may be used to determine the Risk Margin that remove the need to perform a full projection of the SCR (excluding hedgeable market risk) at each future time period.

Rather than performing a full projection of the SCR at each future time period, the Group uses a simplified approach

to determine the Risk Margin in most instances. Under the simplified methodology, each component of the Basic Solvency Capital Requirement ("BSCR") (excluding market risk) is projected by assuming that the initial value runs off in line with an appropriate component of the BEL.

This approach is consistent with Method 1 of the Hierarchy of Simplifications outlined in the SII Guidelines.

To arrive at the Risk Margin, the projected non-hedgeable SCRs at each future time-step are multiplied by a 6% cost of capital rate and discounted using the SII basic risk-free term structure of interest rates.

Consistent with SII rules, the Group's Risk Margin is calculated without taking credit for the effects of the MAs in non-profit funds ("NPF"), NPF MA1 and NPF MA2.

D.2.3 UNCERTAINTY ASSOCIATED WITH THE VALUE OF TECHNICAL PROVISIONS

Sensitivity tests on the assumptions are carried out to ensure the uncertainties are well understood and incorporated in the capital and risk management of the business.

The majority of the Group's business is unit-linked business. For unit-linked business, technical provisions are calculated as a whole, representing the value of units credited to the policyholder. Therefore, in absolute terms, there is very limited uncertainty regarding the value assigned.

The BEL component of the technical provisions represents the value of future revenues (net of expenses) based on the cash flow projection model and is equivalent to future product charges (income) less future expenses less future claims in excess of unit reserves. This component of technical provisions therefore carries greater uncertainty, principally driven by the following:

- > Economic uncertainty related to future income from unit funds, e.g. reductions in unit funds from falls in markets will result in lower future asset-based revenues and lower future profits. This will cause the BEL to increase; and
- > Uncertainty related to future administration costs for servicing the in-force policies, e.g. higher than expected future expenses to service the in-force business will result in lower future funds. This will cause the best estimate liabilities to increase.

The BEL component of technical provisions and its inherent risk profile also have a second-order effect on the size of the Risk Margin.

The Group uses asset liability matching and currently invests shareholder assets in low risk investments such as government bonds. There are exposure limits for individual counterparties and a Group Investment and Market Risk Policy. There are no changes to this policy or above methodologies following the acquisition of Quilter International.

D.2 TECHNICAL PROVISIONS (CONTINUED)

D.2.4 DIFFERENCES BETWEEN SOLVENCY II AND IFRS BASES, METHODS, AND ASSUMPTIONS

The table below provides a reconciliation of the value of technical provisions between SII and IFRS bases.

SII technical provisions	63,475.0	37,342.2
Deduct: Outstanding claims moved to insurance payables	(33.8)	(34.0)
Add: Risk Margin	496.8	285.0
Adjustments to align to SII valuation basis	(1,767.5)	(889.5)
Gross IFRS technical provisions	64,779.5	37,980.7
LIABILITIES	£m	£m
	31 DECEMBER 2021	31 DECEMBER 2020 restated*

^{*}For full details of restatement see note 2 of the UGP 2021 Annual Report.

D.2.5 MATCHING ADJUSTMENT

The Group applies the MA in ULP. The following table summarises the two MA portfolios in place at 31 December 2021. For the purpose of this report the tables in this section have been shown in £m.

MA PORTFOLIO LIABILITIES AT 31 DECEMBER (£m)

CONTRACT	NO OF CO	NTRACTS	BEL (W	ITH MA)	BEL (NO MA)		
CONTRACT	2021	2020	2021	2020	2021	2020	
ANNUITIES (NPF MA1)	25,667	26,286	389.1	476.4	421.4	513.2	
FUNERAL PLAN (NPF MA2)	12,100	13,239	66.1	68.7	66.4	70.4	
Total	37,767	39,525	455.2	545.0	487.8	583.7	

In each of the two MA portfolios, the liabilities and the assets held to match those liabilities satisfy the specific requirements that must be met in order to apply the MA.

For each MA portfolio, the corresponding MA is added to the basic risk-free term structure of interest rates at all durations. The adjusted interest rate curve is then used to discount the BEL cash flows projected to emerge in that portfolio.

No allowance for the MA is made in the calculation of the Risk Margin in respect of the MA portfolios, and the MA is not applied when discounting the reinsurance cash flows associated with this business.

The table below sets out the MA used in the 31 December 2021 valuation in respect of each of the two MA portfolios.

MATCHING ADJUSTMENT RATES

COMPONENT	DESCRIPTION	NPF MA1	NPF MA2
RATE 1	Single annual discount rate that equates the discounted value of the expected liability cash flows to the market value of the assets held to match those cash flows.	2.29%	0.92%
RATE 2	Single annual discount rate that equates the discounted value of the expected liability cash flows to the BEL calculated using the basic risk-free interest rate term structure with no adjustments.	0.92%	0.88%
FUNDAMENTAL SPREAD	A component of credit spreads that reflects the cost of downgrades and a long-term average spread underpin. It varies by: currency, asset class, credit rating and duration.	0.46%	0.00%
	Matching Adjustment		

D.2 TECHNICAL PROVISIONS (CONTINUED)

The following table summarises the assets held in the two NPF MA1 and NPF MA2 portfolios as at 31 December 2021.

ASSETS IN THE MA PORTFOLIOS

ASSET TYPE	NPF	MA1	NPF MA2		
VALUE AT 31 DECEMBER £m	2021	2020	2021	2020	
CORPORATE BONDS	400.1	433.1	3.1	3.6	
GOVERNMENT BONDS	87.9	110.3	68.9	67.0	
CASH, DEPOSITS AND OTHER	35.3	27.6	1.5	4.7	
Total	523.2	570.9	73.5	75.3	

The table below shows the impact on the balance sheet as at 31 December 2021 of zeroising the MA.

BALANCE SHEET COMPONENT	WITH MA		WIT	ГНОИТ МА	IMPACT OF MA SET TO ZERO		
VALUE AT 31 DECEMBER £m	2021	2020	2021	2020	2021	2020	
ASSETS	65,070.9	38,319.7	65,079.9	38,319.7	-	-	
TECHNICAL PROVISIONS	(63,475.0)	(37,342.2)	(63,507.6)	(37,380.8)	(32.6)	(38.6)	
Excess of Assets over Liabilities	1,595.9	977.5	1,563.3	938.9	(32.6)	(38.6)	
Restricted (With-Profits) Own Funds	(28.6)	(15.9)	(15.5)	(15.9)	13.1	-	
Subordinated Liabilities	397.2	300.0	397.2	300.0	-	-	
Eligible Own Funds	1,964.5	1,261.6	1,945.0	1,222.9	(19.5)	(38.6)	
Solvency Capital Requirement	1,109.9	688.9	1,110.8	693.4	0.9	4.5	
Solvency Ratio	177%	183%	175%	176%	(2%)	(7%)	
Minimum Capital Requirement	378.1	224.7	378.7	225.5	0.7	0.8	

The benefit of the MA is largely due to ULP's significant exposure to annuities in payment. The combined value of the BEL in the two MA portfolios is £455m (2020: £545m). Due to the long-term nature of these liabilities the uplift to the discount rate from the MA has a material impact on the BEL, reducing it by £33m (2020: £39m).

The Own Funds associated with the ULP MA ring fenced funds ("RFF") is higher than the SCR associated with these funds at 2021 year-end. This creates a RFF restriction under SII rules. Under the scenario where there is no MA the RFF restrictions are no longer required, releasing additional capital compared to 2020-year end.

D.2 TECHNICAL PROVISIONS (CONTINUED)

D.2.6 TRANSITIONAL MEASURES ON TECHNICAL PROVISIONS (TMTPs)

The Group does not have any TMTPs as referred to in the SII Directive.

D.2.7 VOLATILITY ADJUSTMENT AND TRANSITIONAL ARRANGEMENTS ON INTEREST RATE

The Group does not make use of the volatility adjustment as referred to in Article 77d of the SII Directive.

D.2.8 TRANSITIONAL RISK-FREE INTEREST RATE TERM-STRUCTURE

The Group does not make use of the transitional arrangements on interest rate as referred to in Article 308c in the SII Directive.

D.2.9 REINSURANCE RECOVERABLES

Reinsurance recoverables are defined as the present value of the future liability cash flows referring to reinsurance contract agreements.

Reinsurance recoverables are calculated on the same basis and using the same contract boundary conditions as the best estimate liabilities (gross of reinsurance) described above. Reinsurance recoverables are reported as an asset on the balance sheet. Reinsurance recoverables are adjusted for expected losses due to reinsurer counterparty default.

D.3 OTHER LIABILITIES

The Group has considered the nature, function, risk, and materiality of other liabilities when aggregating the other liabilities into material classes in order to identify the valuation bases that should be applied to each class.

D.3.1 UNALLOCATED SURPLUS

In line with SII requirements, the BEL for the Group's with-profits business contains an allowance for Future Discretionary Benefits ("FDBs"): the payment of bonuses that are expected to be declared in the future. FDBs consists of future reversionary bonuses, terminal bonuses and other non-guaranteed bonuses.

A prospective Bonus Reserve Value ("BRV") approach is used for all with-profits sub-funds. An iterative surplus minimisation process is initially carried out, which searches for a terminal bonus rate that, when applied, results in a BRV that matches the (net of current liabilities) asset value for each fund (subject to a tolerance). For these funds, the FDB is calculated to be the value of the assets less the value of the guaranteed liabilities.

D.3.2 SUBORDINATED LIABILITIES

Subordinated liabilities of £397m comprise the external listed Tier 2 debt as described in Section E.1.3.

Under IFRS rules, any subordinated liabilities issued by the Group are recognised at amortised cost; under SII rules these are measured at fair value, with changes in own credit standing removed after initial measurement, and any accrued interest on the liability is classified with the principal amount.

D.3.3 DEFERRED TAX LIABILITIES

Deferred tax liabilities on a SII balance sheet represent tax to be paid in future periods, arising due to taxable temporary differences on a SII basis. Differences between the IFRS basis and the SII basis relate primarily to the tax impact in respect of the valuation differences on assets and liabilities, as detailed in this section. This primarily includes the elimination of deferred acquisition costs and deferred front end fees, and recognition of a deferred tax liability on the future taxable profits arising on the in-force business as reflected within the SII technical provisions.

D.3.4 FINANCIAL LIABILITIES OTHER THAN DEBTS OWED TO CREDIT INSTITUTIONS

Amounts owed to credit institutions shall include all amounts arising out of banking transactions owed to other domestic or foreign credit institutions by the credit institution drawing up the balance sheet, regardless of their actual designations.

The only exception shall be liabilities represented by debt securities or by any other security.

D.3 OTHER LIABILITIES (CONTINUED)

D.3.5 LEASE LIABILITIES

The Group has recognised liabilities of £25.4m (2020: £18.6m) in respect of lease liabilities, both under IFRS and SII rules. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined then the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow funds to obtain an asset of similar value to the right-of-use asset. The value produced using the IFRS 16 valuation methodology is considered to provide a materially accurate approximation for the fair value required under SII.

D.3.6 PENSION BENEFIT SCHEMES

The Group operates two defined benefit pension schemes - the Reliance Pension Scheme ("RPS") and Utmost Worldwide Employee Pension Scheme ("UWEPS").

The Group only recognises a surplus to the extent that it is able to access the surplus either through an unconditional right of refund or through reduced future contributions relating to ongoing service of active members.

The liability recognised in the IFRS statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the statement of financial position date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs.

The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity that approximate the terms of the related pension liability.

The SII balance sheet value of RPS and UWEPS is set equal to the IFRS valuation.

The table below provides a summary of the IFRS deficit/surplus under each scheme and the values recognised in the SII balance sheet as at 31 December 2021.

£m	SII		IFI	RS	Difference		
IIII	2021	2020	2021	2020	2021	2020	
RPS	(1.4)	(2.3)	(1.4)	(2.3)	-	-	
UWEPS	3.0	-	3.0	-	-	-	

D.3.7 OTHER LIABILITIES

Under IFRS this line includes £62m (2020: £52m) of deferred front end fees which are not recognised on the SII balance sheet. There are no other valuation difference between the SII and the IFRS financial statements.

D.3.8 CONTINGENT LIABILITIES

The Group does not have any contingent liabilities.

D.4 ALTERNATIVE METHODS FOR VALUATION

The Group's assets and liabilities are primarily measured at fair value for both IFRS and SII purposes, applying the three levels of inputs based on the fair value hierarchy in accordance with IFRS 7 'Financial Instruments: Disclosures'.

As discussed in the 'Valuation requirements of SII' section above, quoted market prices from active markets are used where possible, but where this is not possible and no quoted prices for similar assets/liabilities are available, the Group must value its assets based on alternative methods using inputs not based on observable market data. The assets for which alternative valuation methods are applied are primarily assets held to cover linked liabilities, and any changes in the value of such assets have a corresponding change in the value of the linked liabilities, resulting in no direct net impact on the Group's equity or profitability (an indirect impact on the Group's performance based fees and expenses may occur, although this indirect impact will be of a reduced magnitude compared to the change in the asset value).

As at 31 December 2021, £1,796m (2020: £273m) of Level 3 assets (representing 2.67% (2020: 0.69%)) are valued using alternative methods. These assets are valued using a variety of methods according to the specific asset in question in order to provide the most reliable valuation, typically consisting of unaudited financial statements or valuations provided by a third party administrator. The majority of these assets are backing unit-linked liabilities, and accordingly any fair value movements on these assets are broadly offset by a corresponding liability movement, resulting in limited impact to Group Own Funds (and IFRS equity). Fair value movements in respect of Level 3 assets of £2m (2020: £(14)m) have been recognised in 2021 as presented in note 32 of the UGP 2021 Annual Report. There are no individually material Level 3 assets held by the Group within the £1,796m noted above deemed to require further disclosure in this section, and there are not considered to be any key assumptions applied across assets valued using alternative methods to which the Group is sensitive/exposed. The Group has policies in place to minimise and monitor investment in assets classified as Level 3 under IFRS 7, in line with the requirements of the Prudent Person Principle as discussed in Section C.2.3.

Valuation uncertainty when using alternative methods

Valuation uncertainty is determined by the extent to which unobservable inputs affect the overall valuation of the asset or liability concerned. To address valuation uncertainty, sensitivities to favourable and unfavourable movements in unobservable input parameters are assessed and presented in note 31 of the UGP 2021 Annual Report. Further details of sensitivities can be found in Section C.7 of this report. The Group does not consider that there are any significant sensitivities to the fair value of the Level 3 investments should there be a change in the unobservable inputs.

D.5 ANY OTHER INFORMATION

WAIVERS, DISCRETIONS AND EXCLUSIONS

There is currently a waiver within the Group. This sits within ULP on the FCA register. ULP has been granted permission to apply a matching adjustment to the riskfree interest term structure. This waiver can be seen on the FCA register at https://register.fca.org.uk/s/ firm?id=001b000003jOH5sAAG.

COVID-19 has had no significant impact on the valuation of the Group during the reporting period. Further details are provided in Section A.1.14.

There is no further information the Group considers material to disclose in Section D.

E.1 OWN FUNDS

E.1.1 CAPITAL MANAGEMENT

The Group monitors and manages capital on a SII basis, and in accordance with local regulatory requirements. The Group's capital management policies allow the Group to meet a number of objectives including:

- satisfying the requirements of its policyholders, creditors, and regulators;
- maintaining financial strength to support new business growth and create shareholder value; and
- > matching the profile of its assets and liabilities, taking account of the risks inherent in the business.

Responsibility for the Group's capital management ultimately sits with the Board, with responsibility where required and where appropriate delegated to the boards of each of the underlying businesses. Capital is monitored and managed monthly, with more regular updates where necessary to ensure the Group stays within its regulatory requirements and risk appetite.

The Group's capital resources- represented by Group Own Funds- and capital requirements- represented by the Group SCR and MCGSCR – are regularly monitored by the Board. The Group's policy is to at all times hold the higher of:

- > the Group's internal assessment of the capital required; and
- > the capital requirement of the relevant supervisory body.

Details of the specific capital management policies for each of the insurance undertakings within the Group are detailed within the UGP 2021 Annual Report.

E.1.2 GROUP OWN FUNDS AS AT 31 DECEMBER 2021

As at 31 December 2021, Group Own Funds are £1,964m (2020: £1,262m), corresponding to a Group Solvency Coverage ratio of 177% (2020: 183%). The eligible Own Funds have increased mainly due to the acquisition of Quilter International. Group solvency is calculated based on Method 1 (default method).

E.1.3 CLASSIFICATION AND COMPOSITION OF OWN FUNDS

The Group applies Method 1 (accounting consolidation-based method) as referred to in Article 230 of the SII Directive to calculate the Group Solvency position.

Under SII, due to the different consolidation approach, subsidiary undertakings outside the insurance consolidation group are not fully consolidated. UPM, Utmost Worldwide (DIFC) Limited, UTSL, QITC and AAM are the only other financial undertakings within the Group. They are valued on the basis of the Group's proportional share of the undertaking's Own Funds (100%) calculated in accordance with the relevant sectoral rules.

At 31 December 2021, the total SII Own Funds consist of £1,567m (2020: £960m) of unrestricted Tier 1 capital resources, £397m (2020: £300m) Tier 2 capital and nil (2020: £2m) of Tier 3 capital. The Tier 2 capital amount comprises Tier 2 debt which is eligible as regulatory capital.

The Group has ordinary share capital of £392.5m (2021: £100m). Share capital consists of 392,500,000 ordinary shares of £1 each.

Subordinated liabilities comprise £397m of external listed Tier 2 debt. The debt is listed on the GEM, and has a coupon of 4 per cent payable bi-annually.

The reconciliation reserve is calculated as the excess of assets over liabilities from the SII balance sheet less basic Own Funds items (ordinary share capital and share premium) and fungibility deductions.

The Group and its insurance subsidiaries have no ancillary funds. Tier 3 capital comprises nil (2020: £1.5m) of deferred tax assets.

The table below shows the composition of Group Own Funds as at 31 December 2021. The classification of Own Funds is also shown between tiers, depending on factors such as quality, liquidity and timeline to availability when liabilities arise.

	2021				2020			
£m	Total	Tier 1	Tier 2	Tier 3	Total	Tier 1	Tier 2	Tier 3
Ordinary share capital	392.5	392.5	-	-	100.0	100.0	-	-
Surplus funds	1.3	1.3	-	-	0.9	0.9	-	-
Subordinated liabilities	397.2	-	397.2	-	300.0	-	300.0	-
Deferred tax assets	-	-	-	-	1.5	-	-	1.5
Reconciliation reserve	1,173.6	1,173.6	-	-	859.2	859.2	-	-
Total eligible Own Funds to meet the Group SCR	1,964.5	1,567.3	397.2	-	1,261.6	960.1	300.0	1.5

E.1 OWN FUNDS (CONTINUED)

Intra-group transactions between entities included in the consolidated insurance group are eliminated on consolidation when preparing the Group's SII balance sheet. Where entities consolidate on a line-by-line basis hold investments in the Group's asset management, these investments are replaced with the Own Funds of the asset management and advisory entities on a sectoral basis.

The Group has an MA in place in ULP. The impact of the MA can be seen in Section D.2.5.

The Group has not placed reliance on the use of transitional measures as set out in the SII Directive and has not applied for the use of the volatility adjustment mechanism.

A breakdown of the reconciliation reserve is shown in the Group QRT S.23.01.22 in Appendix F.1.4.

E.1.4 RECONCILIATION BETWEEN IFRS EQUITY AND SOLVENCY II OWN FUNDS

The table below shows a bridge between the Group's IFRS equity and SII Own Funds as at 31 December 2021.

31 DECEMBER £m	2021	2020 restated
IFRS Equity	1,450.0	*857.0
Revaluation of technical provisions	1,270.7	618.0
Removal of Goodwill, and other Intangible assets	(1,096.6)	(483.8)
Revalue DAC, contract costs and contract liabilities	3.7	8.7
Revalue Financial Instruments to fair value	(14.4)	(2.9)
Revaluation of subordinated debt	2.8	-
Removal of deferred tax arising on Goodwill and other intangible assets	(20.3)	(19.5)
SII excess of assets over liabilities	1,595.9	977.5
Inclusion of subordinated debt	397.2	300.0
Adjustment for restricted own fund items in respect of matching adjustment portfolios and ring fenced funds	(28.6)	(15.9)
Total Group SII Own Funds	1,964.5	1,261.6

^{*}For full details of restatement see note 2 of the UGP 2021 Annual Report.

Revaluation of technical provisions

Technical provisions are valued as the best estimate of future cash flows plus a Risk Margin.

Removal of goodwill and intangibles

Goodwill and intangibles are assets that are recognised under IFRS but valued at nil under SII.

Contract-related balances

DAC, contract costs and contract liabilities are also excluded from the SII balance sheet. The future cash flows associated with these balances form part of the technical provisions calculation.

Reclassification and revaluation of subordinated debt

Under SII rules, the Tier 2 subordinated debt issued by UGP qualifies as regulatory capital, whereas under IFRS rules it is classified as a liability on the Group's balance sheet.

Furthermore, under IFRS the subordinated debt is valued at amortised cost and hence its valuation does not change due to changes in interest rates. Under SII the debt is valued at market value and hence its valuation changes with changes in interest rates (removing any increase or decrease in the value as a result of changes in the Group's own credit standing after initial recognition).

E.1 OWN FUNDS (CONTINUED)

E.1.5 AVAILABILITY AND ELIGIBLE OWN FUNDS

The Group's available and eligible Own Funds are set out in the sections below.

E.1.5.1 Available Own Funds

The availability of Own Funds relates to the ability of capital resources located in one entity in the Group to absorb losses that arise in another Group entity. In line with Article 330 of the Delegated Regulation (EU) 2015/35, the following criteria are used when considering the availability of Own Funds to the Group:

- whether the own fund item is subject to legal or regulatory requirements that restrict the ability of that item to absorb all types of losses wherever they arise in the Group;
- > whether there are legal or regulatory requirements that restrict the transferability of assets to another entity in the Group; and
- > whether making those Own Funds available for covering the Group solvency capital requirement would not be possible within a maximum of nine months.

E.1.5.2 Eligible Own Funds to meet SCR

The Group's Own Funds are subject to certain restrictions in respect of their ability to absorb losses that arise in another part of the group (availability), and ability to cover the Group's SCR (eligibility).

Article 82 of the Delegated Regulation (EU) 2015/35 specifies the quantitative limits in respect of the eligibility of Tier 2 and Tier 3 items.

In respect of compliance with the SCR, these limits are as follows:

- > The eligible amount of Tier 1 items shall be at least 50% of the SCR;
- \rightarrow The eligible amount of Tier 3 items shall be less than 15% of the SCR; and
- The total of Tier 2 and Tier 3 items shall be no more than 50% of the SCR.
- Within these limits, the sum of paid in preference shares (and the related share premium account) and paid in subordinated liabilities classified as Tier 1 shall represent no more than 20% of the total amount of Tier 1 items. Items exceeding this limit are reclassified to Tier 2.

For the SCR eligibility criteria, the eligible amounts of Tier 2 items for the Group do not exceed 50% of the Group SCR. Hence there is no eligibility restriction when calculating the ratio of eligible Own Funds to the Consolidated Group SCR at 31 December 2021.

The table below shows the Group's unrestricted Own Funds at 31 December 2021.

	2021				2020			
£m	Total	Tier 1	Tier 2	Tier 3	Total	Tier 1	Tier 2	Tier 3
Basic Own Funds before deductions	1,964.5	1,567.3	397.2	-	1,261.6	960.1	300.0	1.5
Total eligible Own Funds to meet the Group SCR	1,964.5	1,567.3	397.2	-	1,261.6	960.1	300.0	1.5

E.1 OWN FUNDS (CONTINUED)

E.1.5.3 Eligible Own Funds to meet minimum solvency capital requirements

To meet the MCGSCR requirements, Article 82 requires that the limits are imposed upon eligible amounts of Tier 2 items, which are as follows:

- > The eligible amount of Tier 1 items shall be at least 80% of the MCGSCR;
- > The eligible amount of Tier 2 items shall not exceed 20% of the MCGSCR;
- > Within these limits, the sum of paid in preference shares (and the related share premium account) and paid in subordinated liabilities classified as Tier 1 shall represent no more than 20% of the total amount of Tier 1 items. Items exceeding this limit are reclassified to Tier 2; and
- > Tier 3 items are not eligible to cover the MCGSCR.

For the MCGSCR eligibility criteria, the eligible amount of Tier 2 funds cannot exceed 20% of the MCGSCR of £378m. This has resulted in a £322m (2020: £255m) restriction on Tier 2 Own Funds when calculating the ratio of eligible Own Funds to MCGSCR at 31 December 2021.

Also, by definition, the total amount of eligible Own Funds to meet the MCGSCR is after deductions for participations in other financial undertakings, such as the non-regulated undertakings carrying out financial activities. This participation value amounts to £3.2m (2020: £1.3m) for the Group.

		20	21		2020				
£m	Total	Tier 1	Tier 2	Tier 3	Total	Tier 1	Tier 2	Tier 3	
Basic Own Funds before deductions	1,964.5	1,567.3	397.2	-	1,261.6	960.1	300.0	1.5	
Deduction for participations in other financial undertakings	(3.2)	(3.2)		-	(1.3)	(1.3)	-	-	
Eligibility restriction on the MCGSCR	(321.5)	-	(321.5)	-	(256.6)	-	(255.1)	(1.5)	
Total eligible Own Funds to meet MCGSCR	1,639.8	1,564.1	75.6	-	1,003.7	958.8	44.9	0.0	

E.2 SOLVENCY CAPITAL REQUIREMENT AND MINIMUM CAPITAL REQUIREMENT ("MCR")

This section provides information on the Group's SCR and MCR at 31 December 2021.

E.2.1 CALCULATION OF GROUP SCR

The Group SCR as at 31 December 2021 is £1,110m (2020: £689m). The SCR represents the amount of capital the Group is required to hold and is determined as the economic capital to be held by the Group to ensure it continues to be able to meet obligations to policyholders for the following 12 months following a 1-in-200 shock.

The Group applies Method 1 (default accounting consolidation-based method), as referred to in Article 230 of the SII Directive, to calculate the Group Solvency position. The Group SCR is calculated on a Standard Formula basis

allowing for diversification between insurance undertakings and including the SCR of non-insurance undertakings.

The material insurance entities included in this consolidation are:

- > Utmost Life and Pensions Limited
- > Utmost Worldwide Limited
- > Utmost Limited
- > Utmost PanEurope dac
- > The Equitable Life Assurance Society
- > Quilter International Isle of Man Limited
- > Quilter International Ireland dac
- > Utmost Bermuda Limited

RISK MODULES

31 DECEMBER £m	2021	2020	Change
Market Risk	649.2	444.8	204.3
Counterparty default risk	60.7	64.0	(3.3)
Underwriting risk	791.7	487.7	304.0
Total before diversification	1,501.6	996.4	505.2
Diversification	(349.4)	(248.1)	(101.3)
	, ,	, ,	
Basic solvency capital requirement	1,152.1	748.3	403.8
	47.2	22.0	444
Operational risk	47.3	33.2	14.1
Loss absorbing capacity of deferred taxes	(57.5)	(59.5)	2.0
Loss absorbing capacity of technical provisions	(32.3)	(33.3)	1.0
Other financial sector entities	0.3	0.3	-
Group solvency capital requirement	1,109.9	688.9	421.0

E.2 SOLVENCY CAPITAL REQUIREMENT AND MINIMUM CAPITAL REQUIREMENT (CONTINUED)

The Group SCR as at 31 December 2021 is £1,110m (2020: £689m). It has increased by £421m over 2021 due to the acquisition of Quilter International, strong market performance and strong new business sales.

Where the Standard Formula basis is used, there is an option to apply certain simplifications in the calculation of Group SCR. The Group does not apply any such simplifications to calculate the Group SCR as at 31 December 2021.

The diversification benefit within the SCR calculation is determined based on relative sizes of the risks and the correlation assumptions between them. The Standard Formula prescribes the correlation factors within the risk module and between the risk modules. There are two levels of diversification within each Group's SCR calculation:

- Intra-risk module diversification exists within the market risk module, the life underwriting risk module and the counterparty default risk module, e.g., within the market risk module, diversification benefit exists between the equity risk and the interest rate risk. The SCR for each module shown in the above table is stated after the deduction of this diversification. Its amounts to a total of £284m (2020: £218m) across all three modules.
- Inter-risk module diversification exists between the market risk module, the life underwriting module and the counterparty default risk module. This amounts to £349m (2020: £248m) and is shown separately in the table below.

E.2.2 CALCULATION OF MINIMUM CONSOLIDATED GROUP SOLVENCY CAPITAL REQUIREMENT

The MCGSCR is calculated as a floor to the Group SCR for insurance groups that adopt the Method 1 (accounting consolidation - based approach). This is calculated as the sum of:

- SII MCR for all European Economic Area ("EEA") and UK Method 1 entities, calculated using a formulaic approach (based on items such as technical provisions and premiums), which is subject to a minimum of 25% of the solo SCR and a maximum of 45% of the solo SCR; and
- local capital requirements for insurance entities outside of the EEA and non-insurance entities at which authorisation would be withdrawn.

The Group MCGSCR as at 31 December 2021 is £378m (2020: £225m) corresponding to a coverage ratio of 434% (2020: 447%) when compared to the Group Own Funds eligible to meet the MCGSCR.

E.2.3 OTHER INFORMATION ON THE CALCULATION OF THE SCR

At 31 December 2021, the Group and its EEA and UK subsidiaries are not required to hold a capital add-on in excess of the calculated SCR position. The Group and its EEA and UK subsidiaries do not utilise any undertaking-specific parameters or any simplified calculations options when calculating the SCR.

E.3 USE OF THE DURATION BASED EQUITY RISK SUB-MODULE IN THE CALCULATION OF THE SOLVENCY CAPITAL REQUIREMENT

The Group does not apply the duration-based equity risk sub-module in calculating its solvency capital requirements.

E.4 DIFFERENCES BETWEEN THE STANDARD FORMULA AND ANY INTERNAL MODEL USED

The Group calculates its SCR using the standard formula basis. The Group does not calculate capital requirements using an internal model or partial internal model.

E.5 NON-COMPLIANCE WITH THE MINIMUM CAPITAL REQUIREMENT AND NON-COMPLIANCE WITH THE SOLVENCY CAPITAL REQUIREMENT

The Group has complied at all times through the year with its capital requirements in respect of both the SCR and MCGSCR. There have been no instances of non-compliance with either the SCR and MCR by any of the regulated insurance undertakings in of the Group during the year.

E.6 ANY OTHER INFORMATION

There is no further information the Group considers material to disclose in Section E.

F.1 GROUP QRTS

This appendix contains the following public disclosure QRT's applicable to the Group at 31 December 2021, as required under the SII regulations.

Any public group disclosure Group QRTs referred to in SII legislation that are not relevant to the Group are excluded from the list.

1. S.02.01.02	Balance Sheet
2. S.05.01.02	Premiums, claims and expenses by line of business
3. S.05.02.01	Premiums, claims and expenses by country
4. S.22.01.22	Impact of long term guarantees measures and transitionals
5. S.23.01.22	Own Funds
6. S.25.01.22	Solvency Capital Requirement - for Groups on Standard formula
7. S.32.01.22	Undertakings in the scope of the Group

All figures are presented in £000s with the exception of ratios that are in percentages.

Any annual Group QRTs referred to in SII legislation that are not relevant to the Group are listed below.

1. S.25.02.22 Solvency Capital Requirement - for undertakings using the standard formula and partial internal model

2. S.25.03.22 Solvency Capital Requirement - for undertakings on full internal models

RELEVANT ELEMENTS OF THE GROUP SOLVENCY AND FINANCIAL CONDITION REPORT THAT ARE NOT SUBJECT TO AUDIT

The relevant elements of the Group Solvency and Financial Condition Report that are not subject to audit comprise:

- > The following elements of Group template S.23.01.22
- Rows R0410 to R0440 Own funds of other financial sectors
- > The following elements of Group template S.25.01.22
 - Rows R0500 to R0530 Capital requirement for other financial sectors (Non-insurance capital requirements) (forming part of the sectoral information)
